### DRILLING AT BROKEN HILL TO COMMENCE THIS WEEK

Impact Minerals Limited (ASX:IPT) is pleased to announce that
a diamond drill

programme of up to 1,100m will commence this week at its newly named

Yellowstone prospect and which is being funded by joint venture partner IGO

Limited (ASX:IGO).

The Yellowstone prospect is part of the greater Platinum Springs project area

which lies at the southern end of the Moorkai Trend, a nine kilometre long

ultramafic to mafic dyke and chonolith complex that is very poorly explored.

Two diamond holes have been planned to test a significant electromagnetic

(EM) conductor identified by IGO in an extensive ground EM survey

completed across the project area earlier this year (ASX Release 3rd March 2022).

- IGO Limited secures diamond drill rig at short notice
- Large EM anomaly to be drill tested for high grade massive nickel copper sulphides with PGM at Yellowstone, part of the Platinum

Springs project.

• Up to two holes planned with all Statutory Approvals in place

#### Dr Mike Jones, Impact's Managing Director said:

"It will be great to be drilling at Broken Hill again.

"The EM conductor identified by IGO is of a significant size and has a similar conductance to the high-grade massive nickel-copper-PGM sulphide we discovered at Platinum Springs.

"The anomaly lies within a major structure that may have been a feeder zone for the entire Moorkai Trend and it is a compelling target we are looking forward to testing."
