Cyprium Metals Nanadie Well Mineral Resource Estimate

Cyprium Metals Limited (ASX: CYM), (“Cyprium” or “the Company”) is pleased to announce the Company’s maiden Mineral Resource Estimate for the Nanadie Well deposit to a JORC 2012 standard.

The Nanadie Well Copper-Gold Mineral Resource Estimate forms part of Cyprium’s broader Murchison Copper-Gold Project.

The broader Nanadie Well model further highlights the potential to expand the known resource both along strike and down dip.

The current resource tapers with depth and the potential exists to expand this laterally at depth with further deeper drilling. In addition, the current resource is modelled from near surface to a nominal depth of 220mRL (255m from surface) but potential exists to increase the depth extents to beyond the limits of the deepest drilling which is currently down to 160mRL (315m from surface).

Certainly, deeper holes that extend beyond the lower limits of the modelled 2022 resource have intersected mineralisation with similar down hole mineralised widths and grades as those included in the modelled resource.

This further highlights the potential to identify additional mineralisation within the layered intrusive body at depth. The model also highlighted

trends in the mineralisation with Nickel and Cobalt grades increasing towards the northern end of the current Inferred Resource.

There is also potential to expand the known resource along strike with further closer spaced drilling.

HIGHLIGHTS

□ Nanadie Well polymetallic orebody, preliminary Mineral Resource Estimate contains:

- Copper 162,000 tonnes
- Gold 130,000 ounces
- Silver 1,364,000 ounces
- Cobalt 2,200 tonnes
- Nickel 11,900 tonnes
- Zinc 6,500 tonnes

□ Nanadie Well extends to within one metre of surface

□ Mineralisation is shallow and broad, remaining open at depth and along strike to the north

□ Significant potential for extension

.

Cyprium Metals management comments

“We are very pleased to announce the results of our maiden mineral resource estimate at the Nanadie Well Copper Project in the east Murchison region. The mineral resource highlights the extensive polymetallic potential of the Nanadie Well Project.

This mineral resource estimate also now means the Company has

2012 JORC compliant mineral resources at all of our copper projects.

The shallow Nanadie Well Resource and the Hollandaire Resource are complimentary deposits which are expected to deliver operational synergies.

The Nanadie Well diamond drill core obtained in 2021 will provide sample material for metallurgical leach test work for inclusion in a scoping study.”

Cyprium Metals Executive Director Barry Cahill

City Investors Circle is based in the financial district in the City

of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
