**City Investors Circle is based in the financial district in the City of London**

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email [andrew@city-investors-circle.com](mailto:andrew@city-investors-circle.com)

## **Lahontan Drills High-Grade Oxide Gold From Surface at West Santa Fe**

[\*\*Lahontan Gold Corp. \(TSX.V: LG\)\*\*](#)

Announced the final analytical results from the 2025 maiden drilling program at the Company's satellite West Santa Fe project, located only 13 km from Lahontan's flagship asset, the Santa Fe Mine project, in Nevada's prolific Walker Lane.

## **LAHONTAN DRILLS HIGH GRADE OXIDE GOLD FROM THE SURFACE AT WEST**

**SANTA FE: 37m GRADING 3.11  
g/t Au Eq INCLUDING 11m  
GRADING 5.75 g/t Au Eq**

Toronto Ontario, February 24, 2026 – **Lahontan Gold Corp.** (TSX.V: LG, OTCQB:LGCXF, FSE:Y2F) (the “Company” or “Lahontan”) is pleased to announce the final analytical results from our 2025 maiden drilling program at the Company’s satellite West Santa Fe project, located only 13 km from

Lahontan's flagship asset, the Santa Fe Mine project, in Nevada's prolific Walker Lane.

**The assay results are from the final reverse-circulation rotary ("RC") drill are summarized below:**

- WSF25-04R: 36.6 metres (0.0 – 36.6m) grading 3.11 g/t Au Eq including 10.7 metres (1.5 – 12.2m) grading 5.75 g/t Au Eq from the surface, all oxide.

The drill hole emphasizes the high gold and silver grades associated with the South Zone at West Santa Fe.

- Also included in the intercept is a second high grade zone: 12.2m (22.9 – 35.1m) grading 3.67 g/t Au Eq.

- The grade and geometry of these intercepts correlate well with adjacent historic drill holes, further validating the historic drill hole database. Numbers may not total precisely due to rounding.

**Kimberly Ann, Lahontan Executive Chair, President, CEO, and Founder commented:**

*"The robust assay results from WSF25-04R confirm the high-grade core of the South Zone as defined by historic drilling and underground mine workings.*

*"We are continuing to model the West Santa Fe system to better understand the geology and geometry of gold and silver mineralization. The geologic team is also fine-tuning a followup RC drilling campaign to commence in Spring.*

*“Previous field work, including geologic mapping, rockchip sampling, and airborne magnetic surveys, confirms that the hydrothermal system at West Santa Fe extends at least 1,000 metres east of the main zone of gold and silver mineralization defined by Lahontan and historic drilling (please Lahontan Gold press release dated June 18, 2024).*

*“This possible extension of the main mineralized zone, plus untested down-dip extensions of gold and silver mineralization, will be the key targets of the Spring drilling campaign.*

*“West Santa Fe continues to be an exciting new exploration target for the Company, one with excellent potential to add important shallow, oxide gold and silver resource ounces to Lahontan’s mineral resource ledger.”*

## **Lahontan Gold Drills Thick, Shallow Gold at York and Slab**

[\*\*Lahontan Gold \(TSX.V:LG\)\*\*](#)

Announced the first results from the 2025 Phase Two drilling program at the Company's flagship Santa Fe Mine Project located in Nevada's prolific Walker Lane.

Lahontan has received analytical results for six reverse-circulation rotary ("RC") drill holes totaling 994 metres.

	<b>Lahontan Gold</b>	<b>TSX.V: LG</b>

**LAHONTAN DRILLS THICK,  
SHALLOW GOLD: 114m GRADING  
0.33 g/t Au Eq at  
YORK; 23m GRADING 0.42 g/t Au  
Eq at SLAB**

Toronto Ontario, January 13, 2026 – **Lahontan Gold Corp.** (TSX.V:LG, OTCQB:LGCXF) (the “Company” or “Lahontan”) is pleased to announce the first results from our 2025 Phase Two drilling program at the Company’s flagship Santa Fe Mine Project located in Nevada’s prolific Walker Lane.

Lahontan has received analytical results for six reverse-circulation rotary (“RC”) drill holes totaling 994 metres.

## **Significant results include:**

- York: 114.3 metres (76.2 – 190.5m) grading 0.33 g/t Au Eq in YOR25-004R including 18.3 metres (172.2 – 190.5m) grading 0.90 g/t Au Eq: A shallow, thick, intercept of gold mineralization that expands the footprint of the York gold zone to the north of the current mineral resource pit shell\*, leaving gold mineralization open and unconstrained to the north by modern drilling
- Slab: 22.9 metres (19.8 – 42.7m) grading 0.42 g/t Au Eq in CAL25-009R: Very shallow oxide gold that may pull the Slab pit shell deeper in an updated Mineral Resource Estimate (“MRE”) expected later this year (please plan map for drill hole locations below).
- Slab: 29.0 metres (97.5 – 126.5m) grading 0.26 g/t Au Eq in CAL25-010R: Oxide gold mineralization below the current mineral resource pit shell, an additional opportunity to potentially deepen the Slab conceptual pit shell and capture additional gold resources in the MRE update.

## **Kimberly Ann, Lahontan Executive Chair, President, CEO, and Founder commented:**

*“The Lahontan team is excited to receive the first analytical results from our Phase Two 2025 drill program at Santa Fe.*”

*“The drill results at York reinforce our interpretation that the York deposit continues to the north of the previously defined MRE\* and provides an excellent opportunity to further expand gold Mineral Resources at York.*

*“At Slab, the two drill holes targeting deeper extensions to known shallow oxide gold and silver mineralization were very successful; these drill results will be incorporated into an updated MRE for the entire Santa Fe Mine project, expected in the coming months.*

*“We will be receiving additional analytical results for seven drill holes at Santa Fe and six drill holes at our West Santa Fe project over the coming weeks, so please stay tuned for further press releases!”*

## 121 Mining Conference London

### 121 Mining Conference London

London mining season kicked off with the 121 Mining Conference at Houndsditch this week.

Sadly the buzz that was evident at a recent presentation when gold was riding the crest of the wave seems to have evaporated, despite gold remaining above \$4,000.

A typical scene from the meeting area at  
121 Mining Conference in London

## 121 Mining Conference London – 2025

London mining season kicked off with the 121 mining conference at Houndsditch this week.

Sadly the buzz that was evident at a recent presentation when gold was riding the crest of the wave seems to have evaporated, despite gold remaining above \$4,000.

This is despite gold remaining above \$4,000, but below the heady \$4,300 level. As a result producing gold and silver mining stock prices have been hit hard, blowing the exuberance away in the process.

I had some good meeting and do feel that stock prices are due another rise as long as gold holds around the current level or moves higher.

Of the companies that I met, **Dolly Varden**, **Lahontan Gold**, and **Silver Storm** caught my attention and merit further review.

I recently added **Silver Storm** to the Tier 2 watchlist of developing companies, due to its offtake deal with Samsung, low market cap, and imminent production in Q1 or Q2 2026.

**Dolly Varden** have a quality management team, and will publish a new Mineral Resource Estimate in Q1 2026. They are also looking for potential acquisitions.

**Lahontan Gold** is a small cap early stage exploration play with a past producing open pit gold project, Santa Fe, located

in the Walker Lane Trend in Nevada. Run by Kimberley Ann, who has enjoyed success in the past with a number of exploration companies.

Lahontan have other former producing open pit projects in the same trend, including Santa Fe West, and Moho. In addition there is a disseminated silver project.

---

The show itself, as I mentioned earlier, lacked the buzz I was expecting, due to prices having fallen back quite sharply from their highs despite gold being within 7% of its all-time high.

I noticed a few economy measures, such as no servers for the food, and the food selection had moved somewhat downmarket from previous shows.

My main complaint was the lack of seating given the wide open spaces in the concourse area. Surely they can provide a few more tables for people to sit and eat on?

All in all a good show, and I expect to make a couple of additions to my portfolio as a result of the meetings that I had.
