Mining Review 9th October 2022

A better week for gold despite US bond yields still going up, and the yield curve remains inverted, although it slimmed down a tad.

Another mixed week in the markets, the US DOW is oscillating around the 30,000 mark, and the mining sector had a better week as the price of gold stabilised above \$1700.

A major deal was announced this week, the merger of **Solgold** (AIM: SLG) and TSX listed **Cornerstone Capital**. Cornerstone hold a significant position in **Solgold** shares, and hold other licence areas in the immediate vicinity of Cascabel, so this deals looks sensible to me.

Mining Review Sunday Update 25th Sep.

Interest rates soared this week, the US dollar reached a 22 year high, and gold tanked as a result, losing 1.79% over the week.

Mining stocks tumbled once again, there were some extreme falls, one example being Colonial Coal, which fell 15.3% on Friday in a single day!

Where is it safe to invest at the moment to protect my capital?

Well this was a truly horrendous week for gold, some other metals, and the mining sector in general, with many stocks strongly down on the week.

The monthly newsletter due out on the 30th September will show some really horrible price drops.

It's really concerning me that all asset classes are falling at once, *which begs the question of where to put one's money for safety?*

Not an easy question to answer at the moment, as *property prices* must be due to start falling soon, due to interest rates and recession, *bank rates* are nowhere near the inflation rate, and *crypto* is also taking a hammering.

The price of **gold** in British Pounds is rising as the pound sterling is falling, so some money into physical metal stored securely at home looks a good idea in my view, just don't tell anyone!

I am loathe to sell my better stocks as the turnaround could well come quickly when it eventually arrives, and it would be easy to miss the initial 20% jump waiting for confirmation the market has turned.

I reiterate once again, keep an eye on the level of cash at exploration companies, because if they need to raise funds in this environment it could well be at a discount.

If a company you hold is low on funds and needs to raise, it ***may*** be better to consider selling and wait for the placing, then buy back again at the new lower price. You would of course have to consider the tax implications of such a move,

and consulting your broker first would be advisable.

Companies on our watchlist in the news this week

Colonial Coal lost a whopping 15% on Friday alone, on no news, as market sentiment turned as Chinese lockdown and recession fears resurfaced. Ironically, the price of coking coal rose 4% in the same week, yet the price of iron ore fell!

Fosterville South published good drill news after a long hiatus, too long in fact and interest has been lost in the stock.

Pacgold and **Radisson Mining** came up with some excellent gold intersects, but both fell as a result of the general market malaise.
