Copper Giant Resources Intersects 135 Metres of 1.60% CuEq

Copper Giant Resources (TSX.V: CGNT)

Reported assay results from three drill holes on two platforms at its flagship Mocoa copper-molybdenum porphyry project in Putumayo, Colombia.

Hole MD-074 returned 135 m of 1.60% CuEq from 474 m, the highest-grade interval of more than 100 metres drilled by the Company at Mocoa and nearly three times the average grade of the Indicated Mineral Resource.

Copper Giant Resources Intersects 135 Metres of 1.60% CuEq* (1.02% Cu and 0.107% Mo) Within 724 Metres of 0.78% CuEq* at Mocoa

Copper Giant Intersects 135 Metres of 1.60% CuEq* (1.02% Cu and 0.107% Mo) Within
724 Metres of 0.78% CuEq* at Mocoa

Vancouver, British Columbia – October 27, 2026 – Copper Giant Resources Corp. (“Copper Giant” or the “Company”) (TSXV: CGNT, OTCQX: CGNRF, FRA: 29H0) today reports assay results from three drill holes on two platforms at its flagship Mocoa copper-molybdenum porphyry project in Putumayo, Colombia (“Mocoa” or the “Mocoa Project”).

MD-074 returned 135 metres of 1.60% CuEq* (1.02% Cu and 0.107% Mo) from 474 metres, the highest-grade interval of more than 100 metres drilled by the Company at Mocoa and nearly three times the average grade of the Indicated Mineral Resource[1] (0.54% CuEq*).

The hole ended in mineralization at 903 metres. The interval lies within the conceptual pit shell and returned grades above those modelled in the block model.

MD074 is the fourth hole to return more than 1% CuEq* from the higher-grade zone, following MD073, MD-067 and MD-071 (refer to news release dated September 22, 2026). Beyond the current estimate, directional daughter hole MD-076 carried the breccia system 184 metres west of the historic drilling; MD-075, on the northern side of the deposit, ended inside potassic alteration, closest to the heat source of the system.

These results were received after the drill-hole cut-off date for the Mineral Resource Estimate[1] announced on October 14, 2026 with an effective date of September 24, 2026 (the “Updated MRE”) and are not included in it.

A technical report prepared in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”) which will have the Preliminary Economic Assessment (“PEA”) based on the Updated MRE, will be filed by the end of November 2026.

Edwin Naranjo Sierra, Vice-President of Exploration said,

“MD-074 is the best hole we have drilled at Mocoa with 135m at 1.60% CuEq inside 724 metres of continuous mineralization and still mineralized at the bottom.

“The grade follows the breccia, and MD-076 has shown that breccia continues west into ground that had never been drilled. MD075 reached the potassic zone on the northern side with molybdenum rising, vectoring to the center of the system.

“None of these holes were in the resource estimate we published two weeks ago.”

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com

=======

This website is not sponsored, we are truly independent, and will always remain so

Companies featured here have either presented to the Circle in London, or have been selected because they are considered to have interesting projects, in good jurisdictions, run by an experienced management team.

All information used in the preparation of this communication has been compiled from publicly available sources that we believe to be accurate and reliable, however, we cannot, and do not, guarantee the accuracy or completeness of this.
