The Malartic H deposit consists of multiple stacked lenses now covering an area of 950 metres along strike and 300 metres wide.

Highlights:

- **4.0 g/t Au**over**36.5 metres**in**hole O3MA-23-485** at a vertical depth of 66 metres, including **231.0 g/t** over **0.5 metres** and **1.2 g/t** over **14.4 metres**

O3 Mining’s President and CEO, Mr. José Vizquerra commented:

> *“These new robust and shallow intercepts from our 2023 winter drill program bring us confidence ahead of the maiden near surface resource estimate to be released shortly.*

> *Additionally, higher grade intercepts deeper in the system could signal potential for an underground operation.”*

The 2023 winter drill program on Malartic H covered a one kilometre stretch, filling gaps covered by historic drilling in the shallow part of the Malartic H deposit to achieve an 80 metre spacing.

Historic drilling was completed by NioGold Mining Corp. and Aur Resources Inc., with QA/QC procedures applied and documented.

All assays have been received (except a portion of hole O3MA-23-491 that replicate hole O3MA-23-485, 6 metres apart), and **O3 Mining expects to release a maiden mineral resource estimate on the Malartic H deposit later this month.**
