Vancouver, British Columbia – August 25, 2022 – Cabral Gold Inc. (“Cabral” or the “Company”) (TSX.V: CBR) (OTC: CBGZF) is

- These diamond-drill results from Machichie provide further evidence of the continuity of the Machichie Main

zone at depth and indicate that this zone also contains a significant amount of high-grade gold mineralization

## Alan Carter, Cabral's President and CEO commented;

*"These drill results from the eastern part of the Machichie Main zone extend the mineralized zone to depth, it remains open down-dip on every section.*

*"All five follow-up diamond-drill holes at the Machichie Main zone cut broad zones of alteration including significant zones of high-grade mineralization. This is very similar to the style of mineralization found within the Central and MG gold deposits, as well as the new PDM discovery.*

*"Recent trenching to the west also suggests that the Machichie Main zone extends for more than 900m along strike. To the west, it coalesces with a major north-east trending vein array.*

*"Combined, the Machichie W, Machichie SW, Machichie Main zone and Machichie NE target areas are now referred to as the Machichie Complex, which is likely to grow into a significant deposit."*
