**MAPLE GOLD REPORTS UPDATED
DOUAY MINERAL RESOURCE
ESTIMATE; INDICATED RESOURCES
INCREASE 21% TO 511,000 OZ AU
AND INFERRED RESOURCES
INCREASE 7% TO 2,525,000 OZ
AU ON LIMITED DRILLING**

Vancouver, British Columbia—(Newsfile Corp. — March 17, 2022)
— **Maple Gold Mines Ltd. (TSXV: MGM)** (“Maple Gold” or the

“Company”) is pleased to report the positive results of an updated Mineral Resource Estimate (the “2022 MRE”) for the Douay Gold Project (“Douay” or the “Project”) in Quebec, Canada, which is held by a 50/50 joint venture (the “JV”) between the Company and Agnico Eagle Mines Limited.

Total contained gold ounces at Douay have increased along with further conversion from Inferred to Indicated Resources categories based on successful exploration and infill drilling, comprehensive mineralization modeling, and using higher cost and gold price assumptions compared to the RPA 2019 MRE^[1].

Highlights from the 2022 MRE:

- Pit-constrained Indicated Resources increased **21%** compared to the RPA 2019 MRE¹ to **511,000 ounces** (“oz”) at an average grade of 1.59 grams per tonne gold (“g/t Au”) (from 422,000 oz at an average grade of 1.52 g/t Au)
- Pit-constrained Inferred Resources increased slightly compared to the RPA 2019 MRE¹ to **2,065,000 oz** at an average grade of 0.94 g/t Au (from 2,045,000 oz at an average grade of 0.97 g/t Au)
- Underground Inferred Resources increased **50%** compared to the RPA 2019 MRE¹ to **460,000 oz** at an average grade of 1.68 g/t Au (from 307,000 oz at an average grade of 1.75 g/t Au)
- **Initial Indicated Resources** in the **Nika Zone** (**30,000 oz** at an average grade of 1.13 g/t Au) and the **531 Zone** (**58,000 oz** at an average grade of 2.85 g/t Au), resulting from significant intercepts^[2] from the JV’s first drill campaign (see Figure 1 for zone locations)
- Mineralized zones at Douay **remain open for expansion** and are largely untested below an average vertical drill

depth of approximately 350 metres (“m”) (see Figure 2)

- Ongoing drilling at Douay is primarily focused on exploration targets in areas with **lateral and depth expansion potential** that are not part of the 2022 MRE

.

.

Discovery Costs

Since the RPA 2019 MRE, the Company and the JV have incurred an aggregate of approximately US\$6.1 million in direct exploration expenditures. This equates to a discovery cost of approximately US\$23/oz Au for the incremental resources defined in the 2022 MRE.

Maple Gold management comments

“We completed two modest drill programs in 2020 amid a global pandemic and followed that up with a roughly 10,000-m maiden JV drill campaign in 2021 that, in line with our expectations, successfully converted Inferred to Indicated ounces and ultimately increased the overall gold endowment at Douay,

“Targeted infill drilling demonstrates the potential for future resource conversion within the currently defined mineralized zones and continues to de-risk the deposit; however, the updated model that underpins the 2022 MRE indicates significant room for growth.

“Looking ahead, the Company is targeting larger step-out and

deeper drilling along the full extent of the Douay resource area.”

Matthew Hornor, President and CEO of Maple Gold.

The 2022 MRE is based on a total Douay drill database of 674 holes (241,626 m) within the resource area, of which 38 holes (15,647 m) were completed by the Company and the JV between 2019-2021. Approximately 6,200 m of drilling has been completed by the JV since the 2022 MRE and roughly 10,000 m has been approved and permitted for future drilling, with additional step-out and deeper holes planned. For further clarity, Fall 2021 and Winter 2022 drilling results at Douay are not included in the 2022 MRE.

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and

engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
