

Great Boulder eyes substantial resource growth, hits more high-grade mineralisation

[Great Boulder Resources \(ASX: GBR\)](#)

Announced more high-grade intersections which significantly extend the known mineralisation at its 1.02Moz Side Well Gold Project near Meekatharra in Western Australia.

Great Boulder eyes substantial resource growth as drilling hits more high-grade mineralisation.

Assays of up to 60g/t Au extend Mulga Bill East to 1.5km-long; This discovery remains outside the 1Moz Side Well Resource.

Great Boulder Resources (ASX: GBR) is pleased to announce more high-grade intersections which

significantly extend the known mineralisation at its 1.02Moz Side Well Gold Project near Meekatharra in Western Australia.

Mulga Bill East drilling

Recent RC drilling has been focused on extending the Mulga Bill East area, which sits approximately 200m to 300m east of Mulga Bill.

Mulga Bill East has an existing resource spanning 450m of strike, mainly at the southern end of the deposit.

As mentioned in the Company's ASX announcement of 22 July, 2026 Mulga Bill East had been extended to an overall strike of approximately 900m. This has now grown to approximately 1.5km and mineralisation remains open to the north, south and at depth.

HIGHLIGHTS

- > RC drilling continues to infill and extend the Mulga Bill East area, which sits outside the 782,000oz Mulga Bill – Eaglehawk resource, within the 1Moz Side Well Gold Project
- > Mulga Bill East has grown to +1.5km of strike

and remains open along strike and at depth

> **Highlights from the drilling include:**

- o 2m @ 30.76g/t Au from 133m, including 1m @ 60.9g/t Au from 134m in 26MBRC088
- o 4m @ 7.60g/t Au from 60m in 26MBRC058
- o 2m @ 5.90g/t Au from 73m in 26MBRC080
- o 2.64m @ 14.62g/t Au from 292.36m in 26MBRCD006

> Drilling now being planned to test continuity of mineralisation within quartz lodes extending from Mulga Bill to Mulga Bill East.

Great Boulder's Managing Director, Andrew Paterson said:

"RC drilling outside the resource at Mulga Bill continues to deliver high-grade gold intersections.

"These results extend the Mulga Bill East discovery by 600m, taking it to 1.5km-long.

"A lot of the high-grade intersections within Mulga Bill East correspond to west-dipping vein-

hosted lodes intersected deeper down at Mulga Bill, so many of these results are up-dip projections of veins we've already identified.

"Mulga Bill and Mulga Bill East are around 200m to 300m apart, and the westdipping veins appear to be continuous across that gap between the two.

"The structural continuity and ongoing success in the Mulga Bill – Eaglehawk area continue to support our belief that this is a very significant gold system, with potential to become one of the biggest gold endowments in the Meekatharra field."
