Cyprium Metals management comments

“Progress continues for us at Cyprium, hot on the heels of the robust economics displayed in the release of our Restart Study for Nifty.

“We are announcing another fantastic set of drilling assay results that concludes what has been a highly successful Nifty West drilling programme.

“This is a substantial zone of mineralisation, which provides additional copper tonnes in the future large-scale open pit development, which remains open to the west and south.

“We look forward to adding these drilling results into the updated Nifty Mineral Resource, which is planned to be released during the 2nd quarter of this year.

“We are also looking forward to receiving further assay results from the Nifty southeast drilling programme over the coming weeks.

“In the meantime, our focus is on finalising the financing of the Nifty Restart Study to establish Cyprium as copper producer in the shortest time frame possible.”
