City Investors Circle Mining Review 11th October 2026

News from down under dominated this week with only one significant news release from our Canadian stocks.

Omai Gold declared that the NI 43-101 supports a NPV of $4 Billion.

Gold fluctuated depending upon the news of the day with bond yields and the US attack on Iran and associated retaliatory actions. Stock prices yo-yoed as a result.

Omai Gold Drills 5.12 g/t Au over 40.5m and 2.68 g/t Au over 40.7m at Wenot

Toronto, Ontario – (September 1, 2026) – Omai Gold Mines Corp. (TSXV: OMG) (OTCQB: OMGGF) ("Omai Gold" or the "Company") is pleased to announce assay results from eleven additional diamond drill holes from the ongoing 50,000 metre ("m") drilling program at its 100% owned Omai Gold Project in Guyana, South America.

Each drill hole on the Wenot Deposit encountered multiple gold zones. Hole
26ODD-193 in central Wenot intersected 11 discrete gold zones including 5.12 g/t Au over 40.5m, which included 11.29 g/t Au over 10.4m at a vertical depth of between -260 to -290m within the prolific Dike Corridor.

Given that an economic cut-off grade of 0.3 g/t Au was applied to the Wenot open pit deposit, these intersections are very

significant.

Five rigs continue to drill at Omai. To date this year, 74 drill holes have been completed, totalling 35,149m. Hole 26ODD-208, testing the depth potential of the Gilt Deposit, was completed at a downhole depth of 1,438m (~1,200m vertical depth). Samples from the upper part of the hole have been submitted for assaying.

Certain selected whole core samples are being prepared for mineral processing testing.

Elaine Ellingham, President & CEO, commented:

"We are pleased to deliver further strong drill results from Wenot.

"Drilling is expected to continue through to mid-December with the five rigs. Our Preliminary Economic Assessment ("PEA") recently announced for the Omai Project, exceeded our long established target for a 250,000 to 300,000 ounce per year mine, as we delivered a mine plan for production averaging 351,000 oz per year over an 18-year mine life.

"Our drilling continues to be highly effective; over the past 16 months, we increased the Omai Mineral Resource Estimate

(MRE) by 86%, allowing us to reach this much larger mine plan and also a much lower than market-anticipated strip ratio.

“With a larger mine comes increased upfront capital requirements, however, this optimizes economics and further establishes Omai as one of the largest undeveloped gold projects in South America.

“With the current gold price around $4,500/oz, the Omai PEA supports a net present value (NPV) of $6.2 billion, at a 5% discount. With this strong PEA, we are on a clear trajectory for advancing Omai to the next milestones.

“Today’s drill results continue to demonstrate the potential for the Wenot open pit deposit to continue to expand, while we upgrade the resources and better delineate the very wide and robust zones, particularly in the dike corridor.

“These new drill results also reinforce our confidence in future expansion of the gold zones on the southern side of the Wenot deposit, within the sedimentary sequence.

“Significant new, sediment-hosted gold zones announced include: 4.61 g/t Au over 9.4 m (hole 198), 1.67 g/t Au over 16.9m (hole 193), 6.54 g/t Au over 3.0m (hole 194), and 2.0 g/t Au over 9.8m. To date, we have completed an additional 77 holes, totalling 37,077m, that are not included in the April 2026 MRE.

“The results from this program will contribute to our next resource update, planned for completion before year end, and support our objective of advancing the project towards a feasibility study.”

121 Mining Conference London

Day 1

121 Mining Conference London Day 1

Another appalling performance from South Western Railways resulted in me missing my first two meetings after a cancelled train mid-journey.

The conference was relatively busy, but the number of participating companies seemed smaller to me.

.

121 Mining Conference London Day 1

Another appalling performance from South Western Railways resulted in me missing my first two meetings after a cancelled train mid-journey.

People on a 10 busy 10 coach train had to de-train at Southampton Airport, and, after waiting 30 minutes, then had to join a 5 coach train that was already busy. Needless to say it was like a packed tube train in the rush hour.

Not a great start to the day, arriving at the conference and going straight into a meeting after such an awful journey.

+++++++

The conference was relatively busy, but the number of participating companies seemed smaller than last time to me.

Due to my late arrival I missed meetings with **Nicola Mining** and **Americas Gold and Silver,** both of whom I was looking forward to meeting.

I met **Kemorland Minerals**, an interesting project generator, but it didn't excite me.

I then had interesting meetings with a couple of stocks that I already hold, **Silver Storm Mining,** and **Omai Gold Mines**.

Silver Storm Mining is set to commence production within the next six weeks or so, and one would hope for a nice kick in the share price when that occurs. All is currently on track, so here's hoping for a high silver price to accompany the production announcement.

Omai Gold Mines has a PEA ongoing with a release date of around July, which should be a catalyst for a higher share price. Gold resources should be around 8 million ounces or so.

Copper Giant was the first of the new companies I met today, copper exploration in southern Colombia, in a prolific copper belt. I liked the story and will research further, and

possibly add it to the tier 4 watchlist.

I also met ASX listed **Antipa Minerals** and Canadian gold explorer **Xali Gold**, both of whom I will keep an eye on but I didn't feel as though there was an immediate reason to invest.

+++++++

All in all some interesting meetings and, as a result, I may well increase my shareholding in Silver Storm, and am looking at initial investments in **Omai Gold** and Copper Giant when the market settles down a bit.

Omai Gold Increases Indicated Mineral Resources to 2.5M oz Au at 2.04g/t Au(38.1Mt) and Inferred to 5.5Moz Auat 1.59g/t Au(106.6Mt) with Expansion of Wenot and Gilt Deposits

Toronto, Ontario – (April 14, 2026) – Omai Gold Mines Corp. (TSXV: OMG) (OTCQB: OMGGF) ("Omai Gold" or the "Company") is pleased to announce an updated Mineral Resource Estimate ("MRE") on its 100%-owned Omai Gold Property in Guyana.

The MRE includes expansions to both the Wenot Deposit and Gilt Deposit. Most significantly, the Wenot Indicated MRE increased 49.8% to 1,453,000 ounces ("oz") of gold with an average grade of 1.59 g/t Au, contained in 28.4 million tonnes ("Mt") and the Wenot Inferred MRE increased 7.6% to 3,999,000 oz grading 1.35 g/t Au, contained in 92.4 Mt. Similarly, the adjacent Gilt Deposit saw an overall increase in ounces over the previous MRE.

Gilt’s Inferred MRE increased 120% to 1,465,000 oz averaging 3.22 g/t Au (in 14.2 Mt), while the Indicated MRE decreased by 9.5% to 1,042,000 oz averaging 3.33 g/t Au (in 9.7 Mt).

HIGHLIGHTS:

The Omai Gold Property hosts two orogenic gold deposits: the shear-hosted Wenot Deposit and the adjacent, intrusion-hosted Gilt Deposit with a combined updated MRE (over the August 2025 MRE) of:

• 2,495,000 ounces of gold (Indicated MRE), a 17.6% increase, averaging 2.04 g/t Au in 38.1 Mt and

• 5,465,000 ounces of gold (Inferred MRE), a 24.7% increase, averaging 1.59 g/t Au in 106.6 Mt Wenot Deposit (a constrained pit approach with minor underground is applied)

• 1,453,000 oz of gold in 28.4 Mt (Indicated), a 49.8% increase in ounces (+483,000 oz) over the August 2025 MRE1

• 3,999,000 oz of gold in 92.4 Mt (Inferred), a 7.6% increase in ounces (+282,000 oz)

• 1.59 g/t Au grade of Indicated MRE, an 8.9% increase (from 1.46 g/t Au)

• 1.35 g/t Au grade of Inferred MRE, a 25.8% decrease (from 1.82 g/t Au)

• Increased gold price assumption to $3,000/oz from $2,500/oz at the same cut-off of 0.30 g/t Au Gilt Deposit (an underground mining approach is applied)

• 1,042,000 oz of gold (Indicated) averaging 3.33 g/t Au, in 9.7 Mt, a 9.5% decrease in ounces (-109,000) over the August 2025 MRE

• 1,465,000 oz of gold (Inferred) averaging 3.22 g/t Au, in 14.2 Mt, a 120.3% increase in ounces (+800,000 oz)

• 3.33 g/t Au grade of Indicated MRE, a 3.4% increase (from 3.22 g/t Au)

• 3.22 g/t Au grade of Inferred MRE, a 3.9% decrease (from 3.35 g/t Au)
• Increased gold price assumption to $3,000/oz from $2,500/oz and increased cut-off to 1.7 g/t Au from 1.5 g/t Au

Elaine Ellingham, President & CEO commented,

“We are pleased to be delivering yet another very substantial increase to the Mineral Resource Estimate for our Omai Gold Project in Guyana.

“This reinforces Omai’s position as the largest gold project in Guyana.

“Omai’s unique road access and location just ten kilometres from Guyana’s main road that connects to the two largest towns in Guyana and to northern Brazil, will continue to simplify logistics as the project advances.

“Omai’s legacy benefits include an on-site airstrip, a cleared site, known metallurgical recoveries, and established tailings sites.

“In addition to these unique advantages for developing a large-scale gold deposit, Guyana is proving to be a

favourable jurisdiction for permitting with Government and communities' support for large-scale mine development.

"This, our 5th Mineral Resource Estimate, again reinforces the potential for large-scale mine redevelopment at Omai. The Omai team's dedication has continued to deliver superior value creation for all stakeholders.

"With each successive milestone it becomes even clearer that Omai has the potential to be a multi-decade large-scale gold mining operation.

"Notwithstanding this large gold Mineral Resource Estimate, we still see very significant potential to further expand the gold mineralization at both the Wenot and the Gilt Deposits. Both are open to depth and the deep hole drilled under Wenot in 2025 (25ODD-122W) established the presence of the Wenot shear (hosting 7 gold zones) a full 700 m below the known Wenot deposit.

"A 50,000 m drill program has commenced with five drills turning. Our next major catalyst is the Preliminary Economic Assessment ("PEA"), ***expected to be completed in 2 to 3 months.***

"We are continuing to aggressively drill to increase the Mineral Resources and to upgrade the Inferred Resources, as we set our sights on a future Prefeasibility or Feasibility Study. Drilling is now focused on the Wenot deposit and on certain nearby targets."

=======

City Investors Circle is based in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non-deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness and maintain interest in presenting

companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com

=======

This website is not sponsored, we are truly independent, and will always remain so.

Companies featured here have either presented to the Circle in London, or have been selected because they are considered to have interesting projects, in good jurisdictions, run by an experienced management team.

All information used in the preparation of this communication has been compiled from publicly available sources that we believe to be accurate and reliable, however, we cannot, and do not, guarantee the accuracy or completeness of this.

These articles are for awareness and informational purposes only, and are not recommendations in any form. Always consult an investment professional.

Declaration
