

Orla Mining Drills Oxide Mineralization at South Railroad

Orla Mining (TSX: OLA)

Provided an update on its exploration activities at the South Railroad Project in H2 2023.

This news release presents the first of two updates from the 2023 infill and extension drilling, totaling seven drillholes and representing 2,508 m.

Orla Mining	TSX : OLA

Orla Mining Drills Oxide Mineralization Outside Projected Open Pits at South Railroad Project in Nevada

Pinion: 112.7m at 0.72 g/t Au (oxide)

Dark Star: 36.6m at 3.53 g/t Au, including 19.8m at 5.23 g/t Au (oxide)

Vancouver, BC – March 7, 2024 – **Orla Mining Ltd. (TSX: OLA; NYSE: ORLA)** (“Orla” or the “Company”) is pleased to provide an update on its exploration activities at the South Railroad Project in the second half of 2023.

This news release presents the first of two updates from the

2023 infill and extension drilling, totaling seven drillholes and representing 2,508 metres.

Drilling at South Railroad in 2023 totalled 14,695 metres and additional results from other exploration targets will be shared in a subsequent update.

Highlights

- Potential expansion of resources at Pinion and Dark Star deposits through new oxide intersections in step-out drilling:
 - Pinion: **0.72 g/t Au over 112.7 metres** (oxide)
 - Dark Star: **3.53 g/t Au over 36.6 metres** (oxide)
- Successful infilling and metallurgical drilling with confirmation of modeled grade, continuity of mineralization, via infill drill program.
 - Intersection includes **2.20 g/t Au over 163.1 metres** (oxide) and **2.50 g/t Au over 88.1 metres** (oxide).

Sylvain Guerard, Orla's SVP Exploration stated,

"Since acquiring the South Railroad project in August 2022, Orla has made substantial progress in near-deposit exploration, satellite deposit testing, and expanding our land position along the Carlin Trend.

"The recent positive drill results outside the projected open

pits highlight the project's low exploration maturity and significant growth potential. "

In 2024, we will focus on expanding resources at existing deposits and continuing exploration across the property, which could soon be expanded to include Pony Creek".

2023 Pinion and Dark Star Exploration Highlights

In 2023, Orla extended oxide-hosted gold mineralization at the Pinion and Dark Star deposits, with highly positive drill intersections outside of the projected open pits.

Meanwhile, infill drill results met expectations, confirming robust oxide mineralization within projected pits, while supplying material for new metallurgical column test work to further optimize the planned development project.

"The recent positive drill results outside the projected open pits highlight the project's low exploration maturity and significant growth potential.

“In 2024, we will focus on expanding resources at existing deposits and continuing exploration across the property, which could soon be expanded to include Pony Creek”.

2023 Pinion and Dark Star Exploration Highlights

In 2023, Orla extended oxide-hosted gold mineralization at the Pinion and Dark Star deposits, with highly positive drill intersections outside of the projected open pits.

Meanwhile, infill drill results met expectations, confirming robust oxide mineralization within projected pits, while supplying material for new metallurgical column test work to further optimize the planned development project.

Pinion SE Extension Drilling

At the Pinion deposit, a review of available geological data suggested gold mineralization may be continuous in the southeastern part of the deposit over the Pinion SE target area, where faulting had been previously interpreted as limiting or displacing extension of the mineralization.

To test the continuity of gold mineralization, three drill holes totaling 822 metres were completed. All three drillholes intercepted significant oxide-hosted gold mineralization, including **0.72 g/t Au over 112.7 metres** (oxide) confirming the continuity of gold mineralization to the southeast without fault displacement interference.

These results, combined with historical drill intersections, indicate geological continuity and suggests gold mineralization extends to at least 350 metres outside of the

projected open pit.

Orla Mining Acquires Contact Gold

Orla Mining (TSX: OLA)

Announced that it has entered into a definitive arrangement agreement with Contact Gold Corp. (TSX-V: C) whereby Orla will acquire all of the issued and outstanding common shares of Contact pursuant to a court-approved plan of arrangement.

Contact's land is adjacent to Orla's South railroad project in Nevada.

Pony Creek

Orla Mining	TSX : OLA
Stage	Development
Metals	Gold
Market cap	C\$1.28 billion @ C\$4.07
Location	Zacatecas, Mexico + Nevada + Panama

Orla Mining Enhances Land Position in Nevada with Acquisition of Contact Gold

Pony Creek Property Located Directly Adjacent to Orla's South Railroad Project

Vancouver, BC – February 26, 2024 – **Orla Mining Ltd. (TSX: OLA; NYSE: ORLA)** (“Orla” or the “Company”) is pleased to announce that it has entered into a definitive arrangement agreement (the “Arrangement Agreement”) with **Contact Gold Corp. (TSX-V: C)** (“Contact”) whereby Orla will acquire all of the issued and outstanding common shares of Contact (the “Contact Shares”) pursuant to a court-approved plan of arrangement (the “Transaction”).

Contact’s key asset is the 100%-owned Pony Creek property, a 4,500 hectare exploration land package, strategically located adjacent to Orla’s South Railroad property in the heart of the Carlin trend in Nevada.

Contact also owns the Green Springs property located in the southern end of the Cortez trend. Green Springs is an early-stage exploration project where Centerra Gold currently has a right to earn into 70% of the project through completion of a four-year, \$10.0 million exploration program.

Transaction Terms

Under the terms of the Arrangement Agreement, each holder of Contact shares will receive, for each Contact share held (a “Contact Share”), 0.0063 of an Orla common share (each whole share, an “Orla Share”) (the “Arrangement Consideration”), for total consideration of \$0.03 per Contact Share (based on Orla’s closing price on February 23, 2024), representing a total purchase price of approximately US\$8.1 million.

The Arrangement Consideration represents a 77% premium based on Orla’s and Contact’s 20-day volume weighted average price (“VWAP”) as of February 23, 2024. Following the completion of the Transaction, Contact shareholders will own approximately 0.7% of the issued and outstanding Orla Shares.

Acquisition Highlights and Transaction Rationale

- Consolidates landholdings adjacent to Orla's core growth project, South Railroad, which hosts 1.6 moz of mineral reserves at 0.77 g/t Au, 1.8 moz of measured and indicated mineral resources at 0.74 g/t Au, and 719 koz of inferred mineral resources at 1.00 g/t Au.
- Pony Creek boasts existing resources that have potential to add oxide, transition and sulphide to the resource at South Railroad; three mineralized zones with an inferred mineral resource totaling 433,000 oz at 0.52 g/t Au.
- Enhances Orla's strategic footprint in Nevada, specifically along the prolific Carlin trend. The addition of Pony Creek will complement Orla's control of the southern part of the Railroad Mining District, representing a natural and seamless expansion of the South Railroad property.
- Contact's Pony Creek has a similar geology, structural setting, and mineralization style as South Railroad, providing drill-ready targets, including extensions of known deposits and new targets. Significant exploration potential exists in both the Pony Creek and Green Springs land packages as both projects have been historically underfunded and are underexplored.

***Jason Simpson, President and CEO,
Orla Mining***

"This transaction strengthens our land position in Nevada

along the Carlin trend.

“Contact’s Pony Creek property is a valuable complement to our South Railroad Project, one of our key growth opportunities.

“We look forward to making the necessary investments to unlock the combined potential of this now larger, contiguous and highly prospective land package.”

Vancouver, BC – February 22, 2024 – **Orla Mining Ltd.** (TSX: OLA; NYSE: ORLA) (“Orla” or the “Company”) is pleased to provide an update on its exploration activities on the extension of the Camino Rojo deposit (“Camino Rojo Extension”) in the second half of 2023. These recent exploration results emphasize that the Camino Rojo deposit remains open and has substantial upside potential.

Camino Rojo Extension (Mexico) Summary

Historical and recent exploration drilling targeted lower stratigraphy, beneath the existing resources. In 2023, a drill section was completed 450 metres down-plunge from the current mineral resources and revealed significant intersections of high-grade polymetallic (Au-Ag-Zn) semi-massive to massive replacement-style mineralization (Figure 1). Recent drilling shows that the Camino Rojo mineral system extends beyond the current mineral resource envelope, presenting a considerable opportunity for resource expansion.

- **2023 Program:** The 2023 Camino Rojo Extension drill program involved extending selected infill drillholes beyond the currently defined mineral resources and completing a down-plunge drill section to explore the distal extension into lower stratigraphy; 2,607 metres of drilling across four drill holes. Drill results reported in this press release have returned mineralized intercepts up to 450 metres down plunge of the existing open pit mineral resource boundaries.
- **Initial Metallurgy:** The initial carbon-in-leach (CIL) bottle roll testing within the Camino Rojo Extension on material from CRSX-22-07 and CRSX-22-08C resulted in

impressive gold recoveries between 81-96%. Flotation testing on the CRSX-22-07 material produced a gold concentrate with 85-88% gold recovery and a zinc concentrate with zinc grades of 52% and over 85% zinc recovery, for the polymetallic replacement-style mineralization.

- 2024 Program: The Company plans to complete a 30,000-metre drill program in 2024 with two objectives: 1) to infill the down-plunge geometry, continuity, and endowment potential of mineralization along the projection of the Dike Zone, and 2) to step out broadly and further assess the extensive upside potential of this open mineralized system.

Sylvain Guerard, Orla Mining Senior Vice President, Exploration

“The recent drilling results have added a new dimension to our near-mine exploration program, unveiling an exciting new mineralization style in previously disregarded host rocks.

“With promising initial metallurgical results and substantial upside extension potential, we are committed to driving Orla’s 2024 exploration efforts towards expansion drilling as we look to unlock the full potential of the growing Camino Rojo deposit.” –

Mining Review Sunday 4th February 2024

Mining Review 4th February 2024

The week was once again all about the FED and US interest rates, with positive economic data suggesting a March rate cut was unlikely, causing markets and gold to pull back.

Cabral Gold, i-80 Gold, and Orla Mining all reported strong drilling results this week.

i-80 Gold – Ruby Hill, Nevada

City Investors Circle Mining Review 4th February 2024

The week was once again all about the FED and US interest rates, with positive economic data suggesting a March rate cut was unlikely, causing markets and gold to pull back.

Gold remained above the key \$2,000 level despite the hawkish interest rate comments. This was probably helped by the US announced intention to bomb targets in the Middle East, which eventually occurred on Friday night, after days of announcing their intention to do so.

Turning to companies on our watchlists, there were some positive drill results from **Cabral Gold**, **i-80 Gold**, and **Orla Mining** reported during the week.

One disappointment was the results from **Gold Road Resources** where production for the year was at the low end of guidance, and AISC higher. This resulted in a share pullback, and a share that was trading at just above A\$2 on the 29th December is now back at A\$1.51!

This is really disappointing after waiting so long for GOR to break through the A\$2 resistance level, and one reason why I

was opposed to them commencing dividend payments.

The guidance for 2024 is around the same so despite such as strong gold price the share price looks as though it will settle down at this lower level once again, and it's incredibly disappointing.

On the plus side, despite paying the dividend they have a strong treasury and significant investments in **IGO** and **De Grey**, amongst others, so the company looks healthy moving forward.

All the news form the last week for our watchlist companies is listed below, click the links to be taken to the full story.

Orla Mining Provides an Update on Infill Drilling at Camino Rojo Sulphides Deposit with Multiple Highly Positive Drill Intersections

*3.41 g/t Au over 36m, incl. 29.2 g/t Au over 3.0 m,
2.94 g/t Au over 66.5 m, incl. 4.98 g/t Au over 16.5 m,
2.44 g/t Au over 49.5 m, incl. 4.59 g/t Au over 21.0 m, and
2.22 g/t Au over 96.5 m, incl. 3.24 g/t Au over 33.9 m*

Vancouver, BC – January 25, 2024 – **Orla Mining Ltd.** (TSX: OLA; NYSE: ORLA) (“Orla” or the “Company”) is pleased to provide an update on its exploration activities at the Camino Rojo Sulphides in the second half of 2023.

2023 Exploration Highlights: Camino Rojo Sulphides (Mexico)

In 2023, Orla undertook a 37,677-metre drill program, strategically focusing on infilling higher-grade parts of the Camino Rojo Sulphides deposit to support a potential underground Mineral Resource estimate.

The primary objective was to enhance the understanding of geological controls of the deposit while extending selected drill holes to explore for sulphide mineralization beyond the current open pit Mineral Resource boundaries, referred to as the “Camino Rojo Extension.”

Orla previously presented results from 15 of 56 drill holes in the 2023 Sulphide drill program ([June 22, 2023](#)) and this news release presents results from an additional 23 drill holes. Results from the remaining 18 drill holes will be shared in the coming weeks.

Overall, infill drilling of the Camino Rojo Sulphides has consistently yielded long intercepts (>30 metres down holes) of greater than 2.0 grams of gold per tonne (g/t Au). These significant drill results align with previous work, reinforcing the potential for an underground mining scenario.

Recent drilling has returned notable high-grade intercepts exceeding 10 g/t Au over core lengths ranging from 0.7 metres to 3.0 metres. These high-grade intersections are part of wider intervals of greater than 2.0 g/t Au over tens of metres. The presence of high-grade gold results highlights the opportunity to enhance value through the potential implementation of more selective and targeted underground mining techniques.

**Sylvain Guerard, Orla's Senior Vice President,
Exploration stated,**

"New drill results at Camino Rojo are revealing more about controls on mineralization and hinting at potential for significant expansion below the current Mineral Resource in the Camino Rojo Extension.

"This data is crucial for our upcoming underground resource estimation, enhancing our understanding of this important part of our growth pipeline."

Drill result highlights include:

Camino Rojo Sulphides	
Hole CRSX23-17 incl.	2.54 g/t Au over 68.5m 13.1 g/t Au over 1.5m
Hole CRSX23-19C: incl. and incl.	2.08 g/t Au over 124.5 m 2.46 g/t Au over 60.0m, and incl. 11.7 g/t Au over 1.5m

Mining Review 28th January 2024

We initiated coverage of exploration junior Angus Gold this week.

Impact Minerals, Calidus Resources, i-80 Gold, and Orla Mining all announced significant exploration successes this week.

Ruby Hill, Nevada

City Investors Circle Mining Review 24th January 2024

We initiated coverage of exploration junior **Angus Gold** this week.

Impact Minerals, Calidus Resources, i-80 Gold, and Orla Mining all announced significant exploration successes, after a quiet week following the Vancouver conference last week.

—

The price of some battery metals, most notably lithium, remains very weak, and I remain sceptical of the EV take up in the longer term due to cost of vehicles, range concern, and lack of essential charging infrastructure across the western world. News that Avis in the USA has sold 20,000 EV models and replaced them with the same number of petrol engined vehicles in an example of resistance to change, or a lack of popularity amongst their customers.

Tesla has been reducing prices in the US and China, as have BYD and Ford amongst other EV producers, and it does seem that after the rush of early adopters, there is some difficulty in selling to the next level of consumers.

It will be interesting to see how car producers overcome this, the cost of batteries curtails their ability to reduce prices much more, despite the 75% fall in the price of lithium on the last year.

Orla Mining Reports Positive Results of Layback and Oxide Extension Drilling

Orla Mining (TSX: OLA)

Provided an update on its near-pit exploration activities at Camino Rojo completed in the second half of 2023.

In 2023, Orla completed 6,500 metres of drilling near the Camino Rojo Oxide Mine in Mexico to define additional oxide mineralization near the open pit.

Orla Mining Reports Positive Results of Layback and Oxide Extension Drilling at Camino Rojo Mine

Targeting Additional Near Mine Oxide Ounces

Vancouver, BC – January 18, 2024 – **Orla Mining Ltd.** (TSX: OLA; NYSE: ORLA) (“Orla” or the “Company”) is pleased to provide an update on its near-pit exploration activities at Camino Rojo completed in the second half of 2023.

2023 Exploration Highlights: Camino Rojo Oxides (Mexico)

In 2023, Orla completed 6,500 metres of drilling near the Camino Rojo Oxide Mine in Mexico to define additional oxide mineralization near the open pit.

This near-pit exploration included 2,500 metres of drilling to confirm oxide gold mineralization on the Fresnillo plc property (the “Layback Area”), located immediately north of and adjacent to the Camino Rojo Oxide Mine open pit, and 4,000 metres of drilling targeting the extension of oxide gold mineralization hosted by key structures controlling deeper levels of oxide mineralization within and beyond the currently designed oxide open pit .

An updated resource is planned for the first half of 2024, incorporating, for the first-time, mineral resources in the Layback Area.

***Sylvain Guerard, Orla’s Senior VP,
Exploration, Orla Mining stated,***

“Our 2023 near-mine exploration validated near-surface oxide gold in the Layback Area and uncovered oxide expansion potential near the edge of the Camino Rojo Oxide Mine.

“The positive results from our near-mine oxide drilling

program highlight the opportunity to replace a portion of the depleted ounces at the mine by incorporating incremental near-mine oxide material.

“These positive results pave the way for the 2024 near-mine drill program.”

The Layback Area drilling confirmed and delineated gold mineralization immediately north of and adjacent to the Camino Rojo Oxide Mine open pit (Figure 2). Results from the Layback Area drill program confirmed historical drill results and the continuity of oxide hosted gold mineralization across the property boundary.

Highlights of the Layback Area drill program:

Camino Rojo Layback	
Hole CRLB23-03 :	0.85 g/t Au over 76.0 m incl. 1.28 g/t Au over 28.0 m and 1.27 g/t Au over 10.5 m
Hole CRLB23-08 :	0.48 g/t Au over 67.0 m incl. 1.00 g/t Au over 5.8 m

Mining Review 21st January 2024

A solid set of news releases from our watchlist in what was a busy week for news. Maybe the forthcoming conferences in Vancouver next week caused the rush of exploration results?

Calibre Mining confirmed the acquisition of Marathon Gold, establishing a potential mid-tier mining company producing 250,000 ounces of gold within a year and a half or so.

Calibre Mining Plant in Nicaragua

City Investors Circle Mining Review 21st January 2024

A solid set of news releases from our watchlist in what was a very busy week for news.

Maybe the forthcoming conferences in Vancouver next week caused the rush of exploration results?

Calibre Mining confirmed the acquisition of **Marathon Gold**, establishing a potential mid-tier mining company producing 250,000 ounces of gold within a year and a half or so.

They are diversifying production from a single country, Nicaragua, and now have production in Nevada, and within a year in Newfoundland, both low country risk tier1 jurisdictions.

The other big news is that **Uranium Energy Corp.** is restarting production in Wyoming. I had expected them to restart their Texas facility a while ago, as the uranium price is substantially higher than they need, but they have opted for their Wyoming facility later this year.

Orla mining beat production guidance in another successful year, with the only negative being the government of Panama cancelling their Cerro de Quema licence. This may change after the forthcoming Panamanian election, and will be the subject of an international court in due course, alongside First Quantum Minerals' action for the loss of their licence in Panama, and that government has turned rogue on mining.

Karora Resources announced record gold production at their Beta Hunt and Higginsville mines.

On the exploration front, **Firefly Metals** and **West Red Lake Gold** reported spectacular drill results, and **Calidus Resources**

reported a lithium discovery.

All the news from this week can be read in full by clicking the links below.

Orla Mining Beats Increased 2023 Production Guidance and Provides 2024 Production and Cost Guidance

The Company Repays Nearly \$60 million in Debt in 2023

Vancouver, BC – January 16, 2024 – **Orla Mining Ltd. (TSX: OLA; NYSE: ORLA)** (“Orla” or the “Company”) is pleased to provide an interim operational update for the fourth quarter ended December 31, 2023.

This news release also includes the Company’s 2024 annual guidance which contains the outlook for production, operating and capital costs, and exploration spending across the Company’s portfolio.

(All amounts expressed in million U.S. dollars, unaudited as at December

31, 2023 unless otherwise stated)

Fourth Quarter 2023 Camino Rojo Oxide Mine Operational Update

The Camino Rojo Oxide Mine produced a record 34,484 ounces of gold during the fourth quarter and 121,877 ounces of gold for the full year 2023, exceeding the increased gold production guidance range of 110,000 to 120,000 ounces.

Gold sold was 31,300 ounces during the fourth quarter and 118,993 ounces for the full year.

During the fourth quarter, Orla repaid \$25.0 million towards its revolving credit facility reducing the balance outstanding under its credit facility to \$88.4 million.

The Company also paid the final installment of \$22.8 million to Fresnillo plc as part of the Layback Agreement. In 2023, the Company repaid \$58.9 million towards its debt outstanding.

At December 31, 2023, Orla had a cash position of \$96.6 million and total debt position of \$88.4 million, resulting in a net cash position of \$8.2 million¹.

The Company has \$61.7 million undrawn on its revolving credit facility which supports total liquidity of \$158.3 million at year end¹. Current unaudited liquidity position shown below. Financial and operating results for the fourth quarter and year end 2023 will be provided on March 19, 2024.

Liquidity Position

Cash position	\$96.6
---------------	--------

Long-term debt²	\$88.4
Net cash ^{1,2}	\$8.2
Undrawn debt available	\$61.7
Total available liquidity¹	\$158.2

1. Net cash and liquidity are non-GAAP measures. See the “Non-GAAP Measures” section of this news release for additional information.

2. Long-term debt and undrawn debt may not tie due to rounding

Production and Cost Outlook 2024

Gold production from the Camino Rojo Oxide Mine is expected to be 110,000 to 120,000 ounces in 2024.

The Company is planning to mine approximately 8.3 million tonnes of ore and 9.9 million tonnes of waste for a total of 18.2 million tonnes resulting in a strip ratio of 1.2. The increased strip ratio in 2024 is a result of increased waste mining planned for the east-west pit expansion following the receipt of applicable permits.

Camino Rojo’s 2024 total cash cost is expected to be in a range of \$625 to \$725 per ounce of gold sold, including royalties and net of changes in inventory, while sustaining capital expenditures are expected to total \$18.0 million, of which \$12.5 million is for the planned heap leach pad expansion (phase 2) which is scheduled for the first half of 2024 and \$0.5 million is for capitalized exploration on the Camino Rojo oxide layback.

All-in sustaining costs for 2024 is expected to be in the range of \$875 to \$975 per ounce of gold sold. The higher AISC guidance range in 2024 versus 2023 is predominantly a result

of increased waste stripping at Camino Rojo (~\$85/oz) and sustaining capital related to the heap leach pad expansion (~\$110/oz).

The only exploration expenses that are expected to impact the Company's AISC are capitalized exploration (sustaining) on the Camino Rojo layback area totalling \$0.5 million. All other exploration is either capitalized as non-sustaining or expensed (regional exploration).

Orla focused on multiple exploration projects throughout 2023. Near the Camino Rojo Oxide Mine, a 6,500-metre drilling campaign defined additional oxide mineralization, targeting the layback and oxide extensions. The layback drilling validated historical drill results, confirming the continuity of oxide gold mineralization and extending into the Fresnillo property. Oxide extension drilling revealed significant mineralization with plans for 2024 follow-up.

Orla also executed a successful 34,000-metre drill program into the **Camino Rojo** Sulphides deposit, enhancing understanding of the Camino Rojo Sulphides and testing for sulphide mineralization extension below the limits of current resources. The south-oriented drill holes substantially improved understanding and strengthened the continuity of higher-grade mineralization, with the objective of upgrading existing resources and exploring for new sulphide mineralization beyond current resources.

At **South Railroad in Nevada**, Orla remains dedicated to evaluating the project upside potential, producing positive drill results that enhance the continuity of oxide gold mineralization over the southeast extension of the Pinion Deposit, and uncover high-grade oxide at Dark Star.

Drilling at the North Bullion deposit is aimed at enhancing the resource classification. The 2023 drill program tests across the South Railroad property contributed to an improvement of the geological understanding and led to the identification of new target areas.

Additional exploration details related to 2023 results and 2024 plans, including specific exploration programs, will be provided through separate press releases in the first quarter 2024.

Fourth Quarter 2023 Conference Call

Orla will host a conference call on Wednesday March 20, 2024, at 10:00 AM, Eastern Time, to provide a corporate update following the release of its financial and operating results for the fourth quarter 2023:

Dial-In Numbers / Webcast:

Conference ID: 5844017

Toll: 1 (646) 960-0685

Mining Review 24th December 2023

Mining Review 24th December 2023

Two major announcements by companies on our watchlist list up a normally quiet final week before Christmas.

Galiano Gold acquired the other 45% of the Asanko mine in Ghana from their JV partner, and Calidus Resources announced a stunning deal to acquire the Nullagine mine and immediately lease out 80% of the camp for 10 years bringing in much needed cash to the company.

City Investors Circle Mining Review 24th December 2023

Two major announcements by companies on our watchlist list up a normally quiet final week before Christmas.

Galiano Gold acquired the other 45% of the Asanko mine in Ghana from their JV partner, and Calidus Resources announced a stunning deal to acquire the Nullagine mine and immediately lease out 80% of the camp for 10 years bringing in much needed cash to the company.

In addition, both Eloro and Wesdome reported high grade drill intercepts at their respective projects in Bolivia and Canada respectively.

There was one item of bad news, which predictably came from Orla Mining who informed the market that the Panamanian government were cancelling their rights to mine their Cerro de Quema copper gold project, following on from their similar action against First Quantum, closing their producing copper mine there.

Orla and First Quantum have both promised legal action via international courts, but this process takes years and does not have a certain outcome.

Orla now need to focus on South Railroad in Nevada whilst the Panamanian issue is addresses legally.

Orla Mining Update on Panama and Cerro Quema

Orla Mining (TSX: OLA)

Notes that the Panamanian Ministry of Commerce and Industry has rejected the requests for extension for the three mining concessions comprising the Company's Cerro Quema Project, declared the concessions cancelled, and declared the area

comprising the concessions to be a reserve area.

Cerro Quema Project, Panama

Orla Mining	TSX : OLA
Stage	Development
Metals	Gold
Market cap	C\$1.28 billion @ C\$4.07
Location	Zacatecas, Mexico + Nevada + Panama (Suspended)

Orla Mining Provides Update on Panama and the Cerro Quema Project

Vancouver, BC – December 18, 2023 – **Orla Mining Ltd. (TSX: OLA; NYSE: ORLA)** (“Orla” or the “Company”) notes that the Panamanian Ministry of Commerce and Industry (“MICI”) has rejected the requests for extension for the three mining concessions comprising the Company’s Cerro Quema Project, declared the concessions cancelled and declared the area comprising the concessions to be a reserve area.

While the Company regrets this decision by the Panamanian Government, the Company will continue to monitor developments in Panama, which remain uncertain and quickly evolving.

However, until the Company has greater certainty with respect to the mining concessions, as well as fiscal and legal stability in Panama, *the Company will not consider additional spending towards the development of the Cerro Quema Project.*

The Company will explore all legal remedies available to protect historical investments and potentially unlock additional value for its stakeholders, including taking measures to protect its rights under international law.

The Cerro Quema Project is located on the Azuero Peninsula in the Los Santos Province of Southwestern Panama, about 45 km

southwest of the city of Chitre. The project includes a pre-feasibility-stage, open-pit, heap leach gold project, a copper-gold sulphide resource, and various exploration targets.

The Company believes that the Cerro Quema Project could be an important social and economic contributor to the host communities. To date, the Company has invested over US\$120 million in Panama and, if constructed, the Cerro Quema Project is expected to create employment and skills development opportunities, and contribute tax, royalty, and other fiscal benefits to the host communities and governments.

On November 3, 2023, the National Assembly of Panama passed Law 407, which instituted a moratorium on granting, renewing, or extending concessions for the exploration, extraction, transportation or exploitation of metal mining in Panama.

The Company continued to monitor the impact of Law 407 and other developments in Panama on the Cerro Quema Project.

On December 15, 2023, Minera Cerro Quema, S.A., the Company's subsidiary, received three resolutions from MICI. The resolutions rejected the request for extension for the concessions, declared the concessions canceled due to expiration and declared the area comprising the concessions to be a reserve area under the Panamanian mining code. **Under the Panamanian mining code, MICI is prohibited from granting mining concessions for exploration or extraction on a reserve area.**

Mining Review 22nd October 2023

Mining Review 22nd October 2023

The price of gold has reached a record high in Australian dollar terms, at A\$3,091.

Orla Mining announced a production guidance increase, and Calidus Resources requested a trading halt due a potential announcement re their Pirra Lithium subsidiary.

Nevada King Atlanta Gold Mine – Atlanta infrastructure

City Investors Circle Mining Review 22nd October 2023

The price of gold has reached a record high in Australian dollar terms, at A\$3,091.

This resulted in a strong end of the week for ASX listed gold miners, including our own **Gold Road Resources** which finished the week at A\$1.86 per share, bringing the market cap to the A\$2 billion level.

The reason for the rise in the price of gold is, of course, the ongoing conflict in the Middle East, and the increasing likelihood of a wider conflict, possibly involving other states such as Iran, and Hezbollah from Lebanon.

It seems everyone is spoiling for a fight, and once the Israeli Gaza offensive begins, this looks very likely to spread very quickly, in my view.

I think Israel will react very badly to an attack from Iran, so quite how far the conflict spreads is difficult to determine.

One problem is a severe escalation will result in falls in the equities markets, so physical gold and holdings in gold ETFs look a safer bet for now than the miners themselves, who may well get dragged down in a falling market.

I am not selling any of my producing gold miners, but am concerned about earlier stage explorers, and may exit a couple of positions just to hold cash for now.

News from stocks on our watchlist in the last week

Orla Mining announced a production guidance increase, and **Calidus Resources** requested a trading halt due a potential announcement re their Pirra Lithium subsidiary.

Following recent drill results we initiated coverage of **Nevada King Gold Mines**, which looks a good prospect, in a prolific gold belt, the Battle Mountain Trend, in Nevada, a world class jurisdiction.

Orla Mining Provides Third Quarter 2023 Operational Results and Increases 2023 Annual Gold Production Guidance

Vancouver, BC – October 16, 2023 – **Orla Mining Ltd. (TSX: OLA; NYSE: ORLA)** (“Orla” or the “Company”) is pleased to provide an interim operational update for the third quarter ended September 30, 2023.

During the third quarter of 2023, the Camino Rojo Oxide Mine produced and sold 32,425 and 31,060 ounces of gold, respectively.

Year to date, Camino Rojo has been performing better than plan

and, as a result, the Company is increasing full year gold production guidance to 110,000 to 120,000 ounces from its initial guidance of 100,000 to 110,000 ounces.

As at September 30, 2023, Orla had a cash position of US\$132.7 million and US\$36.7 million undrawn on its revolving credit facility for total liquidity of US\$169.4 million.

Subsequent to quarter end, Orla repaid US\$25 million towards its revolving credit facility, reducing the balance outstanding under the facility to US\$88.4 million.

Third Quarter 2023 Conference Call

Orla will host a conference call on Tuesday November 14, 2023, at 10:00 AM, Eastern Time, to provide a corporate update following the release of its financial and operating results for the third quarter 2023:

Orla Mining Amends Credit

Facility, Strengthens Financial Flexibility and Lowers Cost of Capital

Vancouver, BC – August 29, 2023 – Orla Mining Ltd. (TSX: OLA; NYSE: ORLA) (“Orla” or the “Company”) is pleased to announce that the Company has amended its existing US\$150 million credit facility (the “Amended Credit Facility”) with its existing syndicate of lenders comprised of The Bank of Nova Scotia, Bank of Montreal, and Canadian Imperial Bank of Commerce.

The Amended Credit Facility consists of a US\$150 million revolving term facility.

Amended Credit Facility Highlights:

- Facility size: US\$150 million revolving facility, with the ability to increase the facility to US\$200 million, subject to receipt of additional binding commitments and satisfaction of certain conditions precedent.

The Amended Credit Facility replaces the Company’s existing facility, which consisted of a US\$100 million term facility expiring in April 2027 and US\$50 million revolving facility expiring in April 2025.

- Term: 4-year term, extending the term on the Company’s existing revolving facility by two years. Full repayment of the facility is due upon maturity (August 28, 2027).
- Interest rates: The interest rate for the Amended Credit

Facility will be based on the term SOFR rate, plus an applicable margin ranging from 2.50% to 3.75% based on the Company's leverage ratio at the end of each fiscal quarter. This represents a 25 basis point decrease to the lower end of the range compared to the Company's previous facility.

The standby fee for the undrawn portion of the facility has also been lowered from 25% to 22.5% of the applicable margin.

Etienne Morin, Chief Financial Officer of Orla Mining stated,

"This refinancing provides Orla with additional flexibility to lower its cost of capital while maintaining liquidity."

"We would like to thank our syndicate of lenders who have continued to support Orla and have provided us with additional resources and flexibility to execute on our long-term strategy."

The Amended Credit Facility is payable in full at maturity and removes quarterly mandatory repayments required under the previous term facility.

The Company has drawn US\$113.4 million under the Amended Credit Facility with an applicable margin of 2.50% based on its leverage ratio at closing.

Orla Mining Reports Second Quarter 2023 Results

Revised 2023 All-In Sustaining Cost Guidance to \$700-\$800 per ounce

Vancouver, BC – August 3, 2023 – **Orla Mining Ltd. (TSX: OLA; NYSE: ORLA)** (“Orla” or the “Company”) today announces the results for the second quarter ended June 30, 2023.

(All amounts expressed in U.S. dollars unless otherwise stated)

Second Quarter 2023 Highlights:

- Gold production was 29,058 ounces and gold sold was 29,773 ounces (*pre-released, July 12, 2023*). Year to date gold production is 54,968 ounces. The Company remains on track to meet 2023 annual gold production guidance of 100,000 to 110,000 ounces.
- All-in sustaining costs ("AISC")¹ of \$698 per ounce of gold sold during the second quarter 2023. Year to date AISC is \$696 per ounce of gold. [AISC guidance for the full year 2023 has been reduced to a range of \\$700 to \\$800 per ounce of gold sold from the original guidance of \\$750 to \\$850 per ounce.](#)
- Adjusted earnings¹ for the second quarter was \$14.0 million or \$0.05 per share.
- Net income for the second quarter was \$12.8 million or \$0.04 per share which included \$7.2 million in expensed exploration and development costs.
- Cash flow from operating activities before changes in non-cash working capital during the second quarter was \$22.4.
- At June 30, 2023, the Company had a cash balance of \$114.5 million, an increase of \$30.7 million during the quarter, and a net debt¹ balance of \$20.4 million.
- Advancement of exploration activities across the portfolio which continued to generate strong results, most notably at Camino Rojo where significant results have been returned from infill drilling of the Sulphides mineral resource, on extension of the Sulphides mineralization, and in the regional exploration program where the first visible gold outside of the Camino Rojo deposit was encountered.
- During the quarter, Agnico Eagle partially exercised its top-up right for proceeds of C\$25 million.

**Jason Simpson, President and Chief Executive Officer of Orla
said,**

“Orla endeavours to be a predictable and consistent gold producer and cash generator. Camino Rojo’s operational performance supports these objectives and we are on target to deliver on our 2023 plan.

“Our exploration efforts also continue to generate positive returns and we remain committed to a systematic approach to unlocking value.”

Mining Review 16th July 2023

[Mining Review 16th July 2023](#)

Gold had a better week after poor US employment numbers, base metals were largely positive despite Chinese economic

concerns.

Calidus Resources, Cartier Resources, and i-80 Gold all reported good drill results.

I80 Gold – Ruby Hill

City Investors Circle Mining Review 16th July 2023

Gold had a better week, silver rose a stonking 8%, as did rhodium, with platinum almost making clean sweep for the PM's

with a 7% rise. The only negative was palladium, down a whopping 9% in a week.

A pairs trade, long platinum short palladium is starting to look like a decent bet at the moment.

Base metals were largely positive, despite weakening Chinese economy concerns, with thermal coal, down 9%, the only big loser.

The markets seem to be defying gravity at the moment and another bubble appears to be starting, which is quite incredible when you consider the current economic situation. I just feel that when this exuberance finally comes to an end, the fall is going to be extruciatingly painful.

Companies on our watchlist that made news this week included, Calidus Resources, Cartier Resources, and i-80 Gold, who all reported good drill results.

To read the week's top stories please click on the titles below, to be taken to the full story.

[Cartier Resources Cuts 3.2 g/t Au over 15 m at Chimo](#)

Announced drill hole results from the West Nordeau and West Chimo Mine sectors. Notably, Cartier cut 3.2 gpt over 15 m.

[Neometals Vanadium Offtake Executed with Glencore](#)

Neometals announced the execution of a binding offtake agreement between Novana Oy and Glencore for VRP1. Novana is a

100% owned subsidiary of VRP1's joint venture company, Recycling Industries Scandinavia AB.

[Orla Mining Reported Q2 2023 Operational Results](#)

During the second quarter of 2023, the Camino Rojo Oxide Mine produced and sold 29,058 and 29,773 ounces of gold, respectively. Orla remains on track to meet 2023 annual gold production guidance of 100,000 to 110,000 ounces.

[Canuc Resources Acquired an Additional San Javier Claim](#)

Announced the signing of an agreement to acquire an additional claim at the San Javier Silver-Gold Project in Sonora State, Mexico. The newly acquired claim is contiguous with the Company's existing claims and covers a total of 96.5051 hectares.

[Calidus Resources' Felix discovery Has the Potential to Supply Warrawoona](#)

Calidus announced more strong drilling results at its Felix gold discovery in the Pilbara, WA. The results support Calidus' strategy to grow the inventory, production and mine life at its Warrawoona Gold Project.

[i-80 Gold Announces Best Results at Cove](#)

Announced positive results from two additional underground drill holes at the McCoy-Cove Property, located in Lander County, Nevada. The new results include the best intercepts to date and continue to demonstrate continuity of high-grade mineralization in the CSD/Gap Zone.

Mining Review 9th July 2023

Another lacklustre week, for want of a better adjective, there's simply no excitement in the junior mining sector at the moment. **Scotgold** was the subject of a reprimand to the BBC after it was described in an interview as having discovered a new vein, when in fact they hadn't.

=====

City Investors Circle is based in the financial district in the City

of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com

=====

This website is not sponsored, we are truly independent, and will always remain so.

Companies featured here have either presented to the Circle in London, or have been selected because they are considered to have interesting projects, in good jurisdictions, run by an experienced management team.
