Mining Review Sunday Update 22nd July

This was the week when the new Chilean government showed their true colours as they disallowed the RI02 EIA, despite it being

recommended at the local level. This caused the RIO2 share price to crash by around half in short order.

The Chilean government and its agencies are sending a really negative signal here, one can only hope that those responsible come to their senses in time to rescue the damage caused by their inexplicable decision.

RIO2 bent over backwards to comply with the required standards, and that led to their undoing as they went the extra mile and mounted cameras outside the required area and those cameras caught wildlife activity, thus shooting themselves in the foot, as that has led to their EIA being suspended,

Companies commented on included; American Creek, Calidus Resources, Cornish Metals, Gold Road Resources, and Westhaven Gold.

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and

engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com

=====

This website is not sponsored, we are truly independent, and will always remain so.

Companies featured here have either presented to the Circle in London, or have been selected because they are considered to have interesting projects, in good jurisdictions, run by an experienced management team.

All information used in the preparation of this communication has been compiled from publicly available sources that we believe to be accurate and reliable, however, we cannot, and do not, guarantee the accuracy or completeness of this.

Mining review Sunday Update 26th June 2022

[Mining review Sunday Update 26th June 2022](#)

Another poor week for the mining juniors, but we have to remember we are in the midst of the summer doldrums and this is traditionally a poor time for gold and gold mining stocks.

Chile flexed its muscles regarding the EIA for RI02 (RI0.V), with them being told their document is deficient, which *MAY* mean they have to revisit some sections which could cause up to a year's delay in construction.

Chris Sangster of Ariana Resources addresses a packed house at the recent Global Mining Finance Conference, amidst the splendour of the Armourers' Hall, London.

Mining review Sunday Update 26th June 2022

Another poor week for the mining juniors, but we have to remember we are in the midst of the summer doldrums and this is traditionally a poor time for gold and gold mining stocks.

It is said the best time to buy a gold stock is the 1st August, and if prices continue to fall as they are doing, that may well turn out to be prophetic this year, as there has to be a bottom soon, surely?

I have topped up a few holdings recently allowing me to reduce my average price as well as add some to stocks that I thought had run away from me.

Karora Resources (KRR.to) has halved in very short order, for example, which looks well overdone, even allowing for the disappointing production results just published.

Turning to mining in general, Chile flexed its muscles regarding the EIA for **RI02 (RIO.V)**, with them being told their document is deficient, which *MAY* mean they have to revisit some sections which could cause up to a year's delay in construction.

The recommendation now has to be voted upon by a committee of 12 mining bodies, with a straight majority vote prevailing. Even if RIO lose, there is an appeal process.

I expect intense lobbying from RIO will ultimately prevail, but they will lose precious time and focus resolving this. If they do lose, they will have to redo the EIA, and that may take up to a year.

Needless to say the stock bombed on this news, and is now trading at a 50% loss on the week.

PDAC 2022

It has been confirmed that 17,000 attended PDAC 2022, held in June for the first time. This is around 25% down on the normal numbers, and I can remember 30,000 attending in the past.

Given the move to June, the introduction of the C\$25 per day charge, and no Sunday first day, (which is popular with local investors), I guess you could say the numbers weren't too bad.

I certainly enjoyed it despite numbers obviously being lower in the hall, with the aisles mostly clear and easy to

navigate, and easy to find a table to sit at in the food hall.

Companies on our watchlist in the news this week

[Osisko Development Drilled 19.81 g/t Au over 9.80 m at Cariboo](#)

[Lithium Power Intl. Consolidated Ownership of Maricunga](#)

[Minera Alamos Agreed the Cerro De Oro Surface Rights](#)

[GoldMining Inc. Optioned the Almaden Project to NevGold](#)

[Uranium Energy Corp. Acquired UEX Corporation](#)

[Gold Road Resources Exceeded the DGO Takeover 80% Minimum](#)

Market Data (US\$)
