West Red Lake Gold Intercepts 84.3 g/t Au over 1m, 14.4 g/t Au over 5.5m and 24.4 g/t Au over 1.5m at Rowan

West Red Lake Gold Mines Ltd. (“West Red Lake Gold” or “WRLG” or the “Company”) (**TSXV: WRLG**) (**OTCQB: WRLGF**) is pleased to announce drill results from its fully funded infill and conversion drilling program at the 100% owned **Rowan Project** located in the Red Lake Mining District of Northwestern Ontario, Canada.

Shane Williams, President & CEO, stated,

“We continue to view Rowan as a key piece in our vision for creating a district-scale hub and spoke operation in Red Lake and the assay results received to date from the current drilling program are further reinforcing our confidence in this high-grade satellite deposit.

“While the current drill program at Rowan is focused on infill to prepare for the upcoming planned Pre-Feasibility Study, our Geology team sees excellent potential for continuing to expand this deposit along strike and at depth.

“Red Lake gold systems have deep roots and we believe the vein system at Rowan will continue to grow with additional drilling.

“West Red Lake is fortuitous to have a portfolio of 100% owned quality assets in a premier jurisdiction that will support our vision of becoming a 100,000 ounce per year gold producer in Red Lake by 2028.”

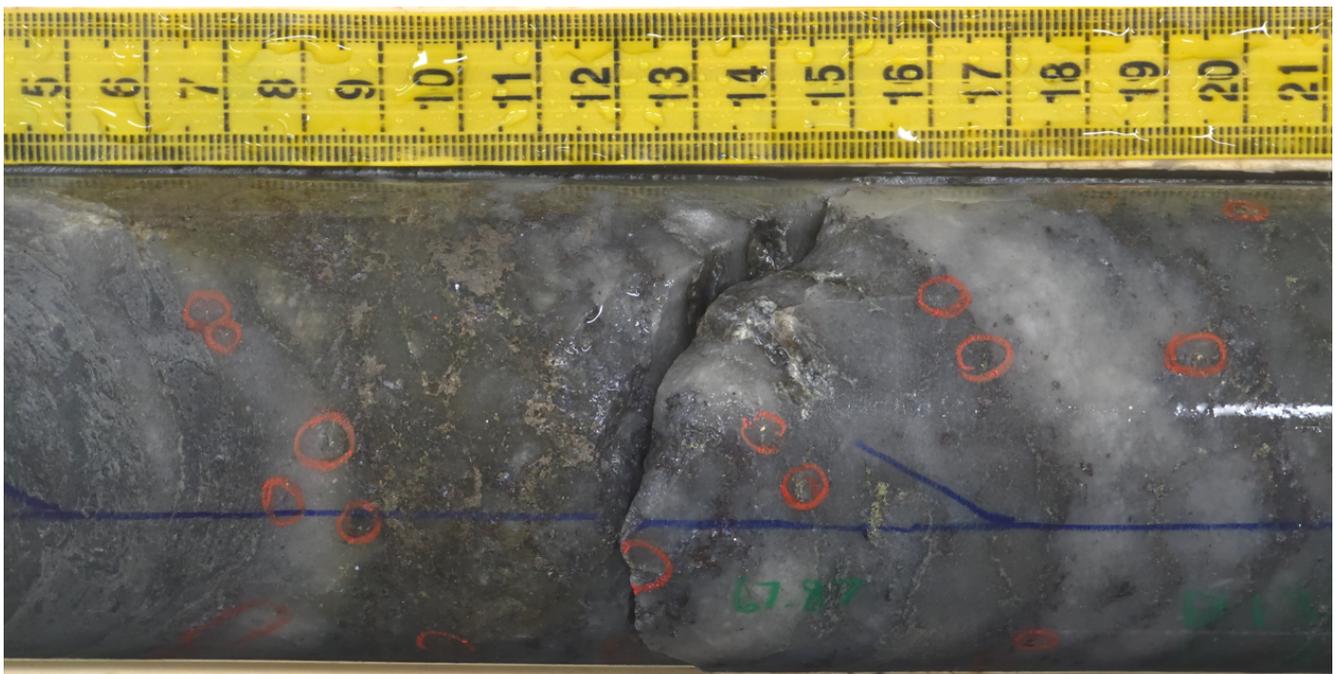

The results featured in this new release are focused on the high-grade **Rowan** vein system and are in addition to the intercepts recently announced on [January 29, 2026](#) which highlighted **141.5 grams per tonne (“g/t”) gold (“Au”) over 1 metre (“m”), 55.8 g/t Au over 1m and 28.5 g/t Au over 1m.**

A total of thirty-eight (38) holes for approximately 6,300m were completed at Rowan in the current drilling program.

Fire assay gold results have been reported for fourteen (14) holes. Results are pending for nineteen (19) holes with five (5) holes currently being logged and prepared for sample shipment.

ROWAN DRILLING HIGHLIGHTS:

- **HoleRLG-25-198** Intersected **Vein 006b** footwall with **1m @ 84.3 grams per tonne gold ("g/t Au")**, from 67.35m to 68.35m. This high-grade intercept was complimented by **visible gold** spatially associated with quartz veining and strong silicification. see picture below.
