Avino Silver Announces Q3 2026 Production Results

Avino Silver & Gold Mines (TSX / NYSE: ASM)

Reported third quarter 2026 production results of 303,189 silver ounces, 1,732 gold oz and 1.1 million pounds of copper, for a total of 582,836 silver equivalent oz.

Q3 2026 represented another important period of progress for Avino, highlighted by the increasing contribution from La Preciosa and a 15% increase in silver production.

AVINO ANNOUNCES Q3 2026 PRODUCTION RESULTS

Avino Silver & Gold Mines Ltd. (ASM: TSX/NYSE American, GV6: FSE) a long-standing silver producer in Mexico, reports third quarter 2026 production results of 303,189 silver ounces ("oz"), 1,732 gold oz and 1.1 million pounds of copper ("lbs"), for a total of 582,836 silver equivalent[1] ("AgEq[1]") oz.

David Wolfin, President and Chief Executive Officer said,

"The third quarter of 2026 represented another important period of progress for Avino, highlighted by the increasing contribution from La Preciosa and a 15% increase in silver production.

"Mill performance remained solid during the quarter, with tonnes milled continuing to exceed expectations, and contributions from La Preciosa development ore continued to increase as the project advanced.

"This growing contribution demonstrates the progress we are making at La Preciosa, with development mining rates and mill throughput reaching above 450 tonnes per day during the third quarter.

“We remain focused on optimizing La Preciosa for future production growth as the project is a key pillar in our transformational growth targets.”

PRODUCTION HIGHLIGHTS – Q3 2026

- **Steady Progress at La Preciosa**: As of the end of Q3 2026, over 3,000 metres of development has been completed at La Preciosa as we prepare for future production mining at both La Gloria and Abundancia veins as the Company has added additional equipment to improve development rates in previous quarters.
- **Primary Silver Production**: Avino produced 303,189 silver ounces, representing over 50% of our silver equivalent[1] production for Q3 2026, as the Company continues to transition to its long-term target of 75% of consolidated silver equivalent[1] production coming from silver ounces.
- **Increased La Preciosa Development Production**: Avino produced 582,836 silver equivalent[1] ounces in Q3 2026, up slightly from Q3 2025 on a consolidated basis. At La Preciosa, development production output increased 5% from Q2 2026, contributing 105,867 AgEq[1] ounces, and consisting of 91,411 silver oz and 166 gold oz. Mill processing of mineralized development material from La Preciosa was above plan for 2026 to date, primarily due to Mill Circuit 2 becoming available for La Preciosa development ore in the second quarter, ahead of schedule. Grades were below plan as elevated silver prices supported the processing of additional lower-

grade development ore.

- **Consistent Mill Throughput:** In Q3 2026, mill throughput remained on plan with 190,379 tonnes processed from both Avino and La Preciosa. Continued steady mill performance and availability reflects the impact of targeted upgrades and automation initiatives led by our operations and maintenance teams over recent years.

Barton Gold Reports Best

Tunkillia Infill Assays to Date

Barton Gold (ASX: BGD)

Announced the final assays from ‘Phase 2’ upgrade drilling at its South Australian Tunkillia Gold Project.

Broad, high-grade assays continue to infill Tunkillia’s ‘Starter Pits’, reinforcing the central high-grade zone driving early project economics, and highlighting the potential for new high-grade mineralisation.

Tunkillia drilling – Credits Barton Gold

	Barton Gold	**ASX: BGD**
	Stage	**Production, development**
	Metals	**Gold**
	Market Cap	**A$264 Million @A$0.98c**
	Location	**South Australia**
	Website	**www.bartongold.com.au**

Barton Gold Reports Final Tunkillia assays among the best infill results to-date, with broad, high-grade intersections throughout ‘Starter Pit’ outlines

Gold Resource upgrade pending, silver Resource upgrade to follow

Barton Gold Holdings Limited (ASX:BGD, OTC:BGDFF, FRA:BGD3) (Barton or Company) is pleased to announce the final assays

from ‘Phase 2’ upgrade drilling at its South Australian Tunkillia Gold Project (Tunkillia).

Broad, high-grade assays continue to infill Tunkillia’s ‘Starter Pits’, reinforcing the central high-grade zone driving early project economics, and highlighting the potential for new high-grade mineralisation.

A total of 57,653m was drilled across 520 RC and DD holes during ‘Phase 1’ and ‘Phase 2’ upgrade drilling, with ‘Phase 2’ comprising 38,760m across 311 holes.

HIGHLIGHTS

• Final assays from recent 39,000m ‘Phase 2’ reverse circulation (RC) Resource upgrade drilling confirm multiple new high-grade intersections throughout high-value ‘Starter Pits’, including:
Hole ID Interval Including:
TKB0724 26m @ 2.79 g/t Au from 126m depth 1m @ 53.5 g/t Au from 129m depth
TKB0736 2m @ 16.75 g/t Au from 56m depth 1m @ 32.4 g/t Au from 56m depth
TKB0737 6m @ 3.05 g/t Au from 58m depth 2m @ 7.20 g/t Au from 58m depth

• *Updated gold and silver JORC Mineral Resource Estimates (MRE) to follow, with PFS targeted for Q1 CY27 delivery to support Mining Lease application thereafter*

Barton Managing Director Alexander Scanlon commented:

“We are pleased with the results of Tunkillia’s ‘Phase 2’ infill assays, which support the highest-grade results of ‘Phase 1’ drilling and the potential for new, shallower zones of high-grade mineralisation within the existing ‘Starter Pits’.

“We are now remodelling all Tunkillia mineralisation with the benefit of nearly 58,000m additional drilling since last year.

“A JORC Resources update for gold is pending, and a JORC update for silver and a PFS are planned for Q1 CY27.”

Barton Gold Extends Tolmer Silver Discovery

Barton Gold (ASX: BGD)

Announced further shallow, broad and high-grade assays at its South Australian Tolmer Silver discovery.

Tolmer is located at its Tarcoola Gold Project , where during 2025 Barton announced one of Australia’s highest-grade modern silver discoveries with an intersection of 6m @ 4,747 g/t Ag from only 46m depth.

	Barton Gold	**ASX: BGD**

Barton Gold Extends Tolmer Silver Discovery – Numerous High-Grade Assays

Multiple new >2,000g-m Ag assays; metallurgical testwork to begin

Barton Gold Holdings Limited (ASX:BGD, OTC:BGDFF, FRA:BGD3) (Barton or Company) is pleased to announce further shallow, broad and high-grade assays at its South Australian Tolmer Silver discovery (Tolmer).

Tolmer is located at its Tarcoola Gold Project (Tarcoola), where during 2025 Barton announced one of Australia's highest-grade modern silver discoveries with an intersection of 6m @ 4,747 g/t Ag from only 46m depth.

These assays have further infilled Tolmer's shallow, high-grade 'western silver zone' mineralisation and extended it to over 500m strike, also yielding broad high-grade intersections in the 'eastern gold zone'.

HIGHLIGHTS

• Recent 3,677m drilling program targeted infill and extension of high-grade Tolmer silver discovery, after preliminary testwork yielded a high-grade concentrate grading over 100,000 g/t Ag (10% silver)
• New high-grade assays infill Tolmer's 'western silver zone' and extend its strike to over 500m, while also adding broad,

high-grade intersections to the ‘eastern gold zone’. These include:

Hole ID Interval Including:

TBM0258 10m @ 399 g/t Ag & 0.55 g/t Au from 56m 4m @ 954 g/t Ag & 1.23 g/t Au from 56m TBM0259 16m @ 120 g/t Ag from 5m, and

16m @ 493 g/t Ag & 0.66 g/t Au from 50m

5m @ 282 g/t Ag from 5m

Commenting on the Tolmer drilling results, Barton MD Alexander Scanlon said:

“Our South Australian Tolmer silver discovery continues to yield broad, high-grade silver assays across an expanding footprint.

“With a shallow profile and having produced trial concentrates grading over 100,000 g/t Ag, Tolmer is already hinting at real potential for a low-cost, high-margin operation.

“We will share our further analysis in due course.

“We are also planning to update our 3.1 million ounce Tunkillia silver Resource, where 58,000m drilling was recently completed to support JORC upgrades, a Pre-Feasibility study, a Mining Lease application and financing discussions.

“Barton’s Tolmer and Tunkillia silver assets are emerging as potentially significant contributors to our South Australian precious metals strategy, whether developed as a complement to our regional gold holdings or on a standalone basis.”

Lahontan Increases Mineral Resources At Santa Fe By 22%

Lahontan Gold Corp. (TSX.V: LG)

Announced an updated Mineral Resource Estimate for its flagship Santa Fe Mine, a past-producing open pit, heap leach, gold and silver mine, located in Nevada's prolific Walker Lane.

The MRE for Santa Fe is based upon 1,275 drill holes totaling 136,515 metres, including 103 drill holes totaling 23,805 metres drilled by Lahontan from 2021 through
May 2026.

	Lahontan Gold	**TSX.V: LG**
	Stage	**Exploration / Development**
	Metals	**Gold**
	Market cap	**C$154m @ C$0.36**
	Location	**Nevada**
	Website	**www.lahontangoldcorp.com**

LAHONTAN ANNOUNCES 22% INCREASE IN MINERAL RESOURCES AT SANTA FE: 1,195,000 Au Eq oz INDICATED, and 1,190,000 Au Eq oz INFERRED

Toronto Ontario, August 17, 2026 – **Lahontan Gold Corp. (TSXV:LG**, OTCQB:LGCXF, FSE:Y2F) (the "Company" or "Lahontan") is pleased to announce an updated Mineral Resource Estimate ("MRE") for its flagship Santa Fe Mine ("Santa Fe"), a past-producing open pit, heap leach, gold and silver mine, located in Nevada's prolific Walker Lane.

The MRE for Santa Fe is based upon 1,275 drill holes totaling 136,515 metres, including 103 drill holes totaling 23,805 metres drilled by Lahontan from 2021 through May 2026.

Highlights of the MRE include:

• Project-wide pit constrained resources increase significantly: Indicated Mineral Resources of 1,195,000 contained gold equivalent ("Au Eq") ounces and Inferred Mineral Resources of 1,190,000 contained Au Eq ounces, a total increase of 435,000 ounces or 22% over the 2024 MRE (assumptions for Au Eq are described in the Notes to Table

One).
• Project-wide average grade for the Indicated Mineral Resource is 0.78 g/t Au Eq; the average grade of the Project-wide Inferred Mineral Resource is 0.61 g/t Au Eq (please see Table One).
• Shallow Slab and York oxide resources expand dramatically: Indicated oxide Resources for the two deposits total 12.09 Mt grading 0.33 g/t Au Eq for 128,000 Au Eq ounces and Inferred oxide Resources total 8.34 Mt grading 0.36 g/t Au Eq for 96,000 Au Eq ounces, an increase of over 37% compared to the resources reported in the 2024 MRE.
• Santa Fe Deposit resources increase by over 26%: Indicated Mineral Resources of 31.15 Mt grading 0.99 g/t Au Eq totaling 993,000 Au Eq ounces and Inferred Mineral Resources of 41.60 Mt grading 0.71 g/t Au Eq totaling 954,000 Au Eq ounces.
• The MRE block model shows that gold and silver mineralization extends well beyond the conceptual pit shells, generating high-quality targets for additional drilling and resource growth, including the increasingly important deep sulfide mineralization at Santa Fe, and throughout the Slab-Calvada-York resource area.

Kimberly Ann, Founder, Executive Chair, CEO, and President of Lahontan Gold Corp commented:

“Lahontan is excited by the results of this updated MRE for the Santa Fe Mine, particularly the large growth in total resource ounces and the continued expansion of the shallow Slab and York oxide gold and silver deposits.

“The MRE will form the basis of an updated Preliminary Economic Assessment (“PEA”) of the Santa Fe Mine. The PEA will examine mining and process options utilizing low-cost open-pit mining and heap leach processing and very importantly, analyze the mining and processing of Santa Fe’s substantial sulfide resources as a Second Phase in future mine operations.

“Our technical consultants, Kappes, Cassiday and Associates (“KCA”) and RESPEC Company LLC (“RESPEC”), both based in Reno, Nevada, are well advanced at project planning, mine design, finalizing the process flow sheet, and optimizing crushing
throughput.

“The Company will use the Phase One oxide conventional leach mine plan to complete its State level mine permitting process and the Company’s Mine Plan of Operation (“MPOO”) with the Federal Bureau of Land Management (“BLM”).

“With the release of the updated MRE and the soon to be completed PEA, Lahontan continues its transition from mine developer to mine operator, targeting 2027 for mine construction at Santa Fe.”

Avino Silver Reports Q2 2026 Financial Results

Avino Silver (TSX: ASM)

A long-standing silver producer in Mexico, announces its unaudited condensed interim consolidated financial results for the second quarter of 2026.

The Company achieved $26.8 million in revenues for Q2 2026, an increase of 23% from Q2 2025.

La Preciosa Mine – Courtesy of Avino Silver

AVINO REPORTS Q2 2026 FINANCIAL RESULTS

Avino Silver & Gold Mines Ltd. (ASM: TSX / NYSE American; FSE: GV6) a long-standing silver producer in Mexico, announces its unaudited condensed interim consolidated financial results for the second quarter of 2026. All amounts are in U.S. dollars unless stated otherwise.

Second Quarter 2026 Financial Highlights

- **Revenues**: The Company achieved $26.8 million in revenues for Q2 2026, an increase of 23% from Q2 2025. 54% of revenues were derived from silver production at an average realized price of $68.90 per ounce.
- **Mine Operating Income**: Mine operating income was $13.0 million, an increase of 27% from Q2 2025.

- **Net Income:** Earnings, or net income after taxes, was $10.9 million, or $0.06 per diluted share, an increase of 281% and 200%, respectively, from Q2 2025.
- **Earnings Before Interest, Taxes, Depreciation and Amortization ("EBITDA")[3] and Adjusted Earnings[3]:** EBITDA was $12.6 million, an increase of 69% from Q2 2025. Adjusted earnings were $11.1 million, or $0.06 per share, an increase of 26% and unchanged, respectively, from Q2 2025.
- **Strong Cash Provided by Operating Activities and Operating Cash Before Working Capital Adjustments[3]:** Cash provided by operating activities was $13.3 million, an increase of 59% from Q2 2025. The Company generated operating cash before working capital adjustments of $8.3 million, an increase of 32% compared to Q2 2025.
- **Mine Operating Cash Flow Before Taxes**: Mine operating cash flows before taxes was $14.4 million, an increase of 28% from Q2 2025.

David Wolfin, President and CEO said,

"During the second quarter, the Company continued its main focus of advancing La Preciosa while free cash flow from Avino further adds to the balance sheet quarter after quarter.

”With La Preciosa development material doubling in mine and mill throughput during the quarter, our transformational growth plan toward becoming a Mexico-focused mid-tier primary silver producer remains on track, and we continue working on delivering long-term value for our shareholders.”

Silver Storm Mining Drills 215 g/t Ag.Eq(1,2) over 11.9 m and 200 g/t Ag.Eq over 15.4 m at the Rosarios Zone

TORONTO, ON / ACCESS Newswire / August 6, 2026 / **Silver Storm Mining Ltd.**(“**Silver Storm**” or the “**Company**“) (TSXV:SVRS) (OTCQX:SVRSF) (FSE:SVR), is pleased to announce drill results from the diamond drilling program at the Company’s 100%-owned La Parrilla Silver Mine Complex (“**La Parrilla**“) located in Durango State, Mexico.

Drillhole results in this release are from the Rosarios Zone within the past-producing Rosarios mine.

Key highlights include:

- Hole IDP-RO-26-004 returned 215 g/t Ag.Eq over 11.90 metres (“m”) (ETW 11.9 m).
- Hole IDP-RO-26-007 returned200 g/t Ag.Eq[1,2]over 15.35 m (ETW[3]13.3 m).
- Hole IDP-RO-26-005 returned297 g/t Ag.Eq over 7.30 m (ETW 7.2 m),160 g/t Ag.Eq over 4.85 m (ETW 4.8 m), and196 g/t Ag.Eq over 3.85 m (ETW 3.8 m).
- Hole IDP-RO-26-002 returned239 g/t Ag.Eq over 5.90 m (ETW 5.7 m).
- Hole IDP-RO-26-008 returned481 g/t Ag.Eq over 1.65 m (ETW 1.6 m)and149 g/t Ag.Eq over 4.10 m (ETW 3.9 m).
- Hole IDP-RO-26-003 returned442 g/t Ag.Eq over 1.00 m (ETW 0.9 m).
- The infill drill results from the Rosarios Zone highlighted the **potential to extend the Indicated Resources by additional 100 m toward the surface along a strike length of 125 m.**

Greg McKenzie, President and CEO, stated:

“We are pleased to deliver yet another impressive set of drill results, this time demonstrating the potential to increase the La Parrilla Mineral Resource at the Rosarios Zone.

“We will continue our 15,000 m drilling program to grow the resource footprint while operations ramp up at La Parrilla.”

Silver Storm Announces First Concentrate Shipment from La

Parrilla

Silver Storm Mining (TSX.V: SVRS)

Announced first shipment of lead-silver and zinc concentrates from the Company’s 100%-owned La Parrilla Silver Mine Complex in Durango State, Mexico.

Silver Storm has successfully produced an initial batch of concentrates using the La Parrilla sulphide processing circuit, and completed an initial shipment of 105 dry metric tonnesof lead-silver concentrate and 70 dmt of zinc concentrate.

Silver Storm Announces First Concentrate Shipment from La Parrilla

Toronto, Ontario, July 27, 2026: Silver Storm Mining Ltd. ("**Silver Storm**" or the "**Company**") (TSX.V: SVRS | OTCQX: SVRSF | FSE: SVR) is pleased to announce first shipment of lead-silver and zinc concentrates from the Company's 100%-owned La Parrilla Silver Mine Complex ("**La Parrilla**") in Durango State, Mexico.

Silver Storm has successfully produced an initial batch of concentrates using the La Parrilla sulphide processing circuit.

The Company has subsequently completed an initial shipment of 105 dry metric tonnes (**“dmt”**) of lead-silver concentrate and 70 dmt of zinc concentrate.

The shipment has been completed as part of the Company’s previously announced offtake prepayment agreement. Silver Storm plans to continue increasing sulphide circuit processing rates with a goal of ramping up toward the nameplate capacity of 1,250 tonnes per day.

Greg McKenzie, President and CEO, commented,

“Our first concentrate shipment is a defining milestone for Silver Storm – real, saleable product from La Parrilla moving to market under our offtake agreement with a globally recognized company.

“Through the hard work of our team, we have taken La Parrilla from care and maintenance to a revenue-generating operation.

“Silver Storm is now in position to continue shipping concentrates on an ongoing basis.”

Avino Silver Announces Q2 2026 Production Results

Avino Silver & Gold Mines (TSX: ASM)

Reported Q2 2026 production results of 267,305 silver ounces , 2,178 gold oz, and 729,929 pounds of copper, for a total of 534,945 silver equivalent oz.

Q2 2026 represented a meaningful increase in contribution from La Preciosa with a 59% increase in silver production.

	Website	**www.avino.com**

AVINO ANNOUNCES Q2 2026 PRODUCTION RESULTS

Avino Silver & Gold Mines Ltd. (ASM: TSX/NYSE American, GV6: FSE) a long-standing silver producer in Mexico, reports second quarter 2026 production results of 267,305 silver ounces ("oz"), 2,178 gold oz and 729,929 pounds of copper ("lbs"), for a total of 534,945 silver equivalent[1] ("AgEq[1]") oz.

David Wolfin, President and Chief Executive Officer of Avino Silver said,

"The second quarter of 2026 represented a meaningful increase in contribution from La Preciosa with a 59% increase in silver production, as we continue to move the project forward.

“Mill performance remained solid during the quarter, with tonnes milled exceeding expectations and contributions from La Preciosa development ore continued to increase throughout the quarter.

“We will continue to optimize performance across our operations to advance our transformational growth plans.

“As noted previously and as La Preciosa advances, we expect that total 2026 production will be more heavily weighted to the second half of 2026.”

PRODUCTION HIGHLIGHTS – Q2 2026

- **Steady Progress at La Preciosa:** Ongoing extraction, haulage, and processing of mineralized development material from La Preciosa was above plan in Q2 2026, primarily due to Mill Circuit 2 becoming available. This increased throughput was offset by intentional processing of lower-grade development ore during elevated metal prices, that would have otherwise been stockpiled.
- **Increased La Preciosa Development Production:** Avino produced 534,945 silver equivalent[1] ounces in Q2 2026, a decrease from Q2 2025, and was a result of lower copper

production. The decrease reflects planned mining sequencing into lower copper grade areas near the historical open pit operations at Avino. At La Preciosa, development production increased 59% from Q1 2026, contributing 100,658 AgEq[1] ounces, and consisting of 84,806 silver oz and 182 gold oz.

- **Consistent Mill Throughput:** In Q2 2026, mill throughput remained on plan with 184,293 tonnes processed from both Avino and La Preciosa. Continued steady mill performance and availability reflects the impact of targeted upgrades and automation initiatives led by our operations and maintenance teams over recent years.

Mogotes Metals Announce Major Gold Discovery

Mogotes Metals (TSX.V: MOG)

Announced partial laboratory assay results from diamond drillhole FS_DDH_016 at the Company's flagship Filo Sur project in Argentina, immediately along strike from BHP and Lundin Mining's Filo del Sol copper-gold-silver discovery.

Assays received for the first 194 m within the 464 m deep hole confirm a continuous zone starting from 108 m depth of near surface, high-grade copper-gold-silver.

.

	Website	www.mogotesmetals.com

High-grade, Shallow, Copper-Gold-Silver-Molybdenum Discovery in Drill Intercept at Filo Sur Project, Vicuña District, reported by Mogotes Metals

High-grade, Shallow, Copper-Gold-Silver-Molybdenum Discovery in Drill Intercept at Albor

Toronto, Ontario – May 14, 2026 – Mogotes Metals Inc. (TSXV: MOG, FSE: OY4, OTCQB: MOGMF) ("Mogotes", or the "Company") is pleased to announce partial laboratory assay results from diamond drillhole FS_DDH_016 at the Company's flagship Filo Sur project in Argentina, immediately along strike from BHP and Lundin Mining's Filo del Sol copper-gold-silver discovery[1].

Assays received for the first 194 m within the 464 m deep hole confirm a continuous zone starting from 108 m depth of near surface, high-grade copper-gold-silver-molybdenum mineralization within chalcopyrite – bornite – covellite bearing breccias, stockwork and dissemination within the altered porphyry matrix.

Mogotes geologists have noted strong parallels with the characteristics of mineralization in hole FS_DDH_016 and those reported from the nearby Filo del Sol deposit[2].

Highlights

· **86 m at 0.7% Cu, 0.55 g/t Au, 2.7 g/t Ag & 169 ppm Mo from 108 m to 194 m down hole to end of assays received to date.**

o **Including 43 m at 1.1% Cu, 0.82 g/t Au, 4.0 g/t Ag & 281 ppm Mo from 111 m**

o **Reported interval ends in mineralization**

o **Assays for the remaining 270 m of the hole are pending.**

· **Shallow high-grade copper, gold, silver and molybdenum mineralization:** mineralization starts at 108 m down hole, and trenching results along strike at surface indicate that mineralization projects to surface beneath a thin scree cover that may also be concealing a larger mineralized target.

· **Generally low levels of arsenic for the Vicuña district:** Arsenic levels are typically low (median for this interval is 2 ppm As) within this mineralized interval with only specific narrow structures with elevated arsenic indicating the local presence of the copper-bearing epithermal mineral enargite.

· **Larger mineral system at play:**The newly identified "**Albor**" target is part of a 3.5 km long Mogotes (Meseta – Luz del Sol – Cumbre – Albor) Miocene age target trend aligned within the regional scale, transorogen, Macho Muerto Fault Zone. Observed multistage alteration and mineralization features in the drill core suggest association with a larger Cu-Au-Ag-Mo mineral system.

· "Albor" is the**second copper-gold-silver-molybdenum discovery**by Mogotes in its inaugural drilling season at Filo Sur (see Cruz del Sur press release) and is part of the large Luz del Sol target trend where drill results are pending for a number of holes drilled in the 2025-2026 exploration season.

Figure 1: Core from 125.75m (FS_DDH_016), 125-126m assays at1.67% Cu, 1.62 g/t Au, 1.69 g/t Ag, 685 ppm Mo

.

CEO Comment

Allen Sabet, President and CEO of Mogotes, commented:

“In our first fully funded drill season at Filo Sur we have now made two significant copper-gold-silver-molybdenum discoveries at Cruz del Sur and at the Albor target, where we have just scratched the surface of something we believe will be significant.

This partial assay release from Albor is a first hole into a shallow and high-grade copper-gold-silver-molybdenum system, strategically located adjacent to the large Vicuña district deposits, where BHP and Lundin Mining are developing the Josemaria copper-gold porphyry and evaluating development options for the very large Filo del Sol deposit.

As this style of mineralization has implications for the broader Vicuña district, we felt it prudent to release partial results for FS_DDH_016 as received.

We continue to be humbled by the geological endowment of this very special part of the world and are grateful for the continued support of our patient shareholders. Stay tuned for more!”

Silver Storm Mobilizes Underground Mine Development Contractors at La Parrilla

Silver Storm Mining (TSX.V: SVRS)

Announced the mobilization of underground mine development contractors at the Company's 100%-owned past-producing La Parrilla Silver Mine Complex located in Durango State, Mexico.

Silver Storm may commence production in Q2 2026.

Silver Storm Announces Mobilization of Underground

Mine Development Contractors at La Parrilla

.

Toronto, Ontario, May 07, 2026: **Silver Storm Mining Ltd.**(“**Silver Storm**” or the “**Company**“) **(TSX.V: SVRS**| OTCQX: SVRSF | FSE: SVR) is pleased to announce the mobilization of underground mine development contractors at the Company’s 100%-owned past-producing La Parrilla Silver Mine Complex (“**La Parrilla**”) located in Durango State, Mexico.

Silver Storm engaged MINPRO S.A. de C.V. (“**MINPRO**”) and Constructora Mexgeo S. de R.L. de C.V. (“**Mexgeo**”) to provide contract underground mine development services at La Parrilla. The mobilization of MINPRO and Mexgeo is ongoing and expected to be completed by the end of May 2026.

Greg McKenzie, President and CEO, stated,

> *“We are excited to have engaged two very experienced mine development contractor companies with strong operational track records in Mexico to provide services at La Parrilla.*
>
> *“Mobilization of these contractors is a key step toward a potential restart of operations at La Parrilla in the second quarter of 2026.”*

Contractor overview: MINPRO and Mexgeo are well-established Mexican mining contractor firms supporting gold, silver, and polymetallic operations across Mexico’s principal producing regions.

- MINPRO, founded in 2008 and headquartered in Chihuahua, provides underground and open-pit development, drilling, blasting, and haulage services. MINPRO is recognized for its strong safety performance, engineering discipline, and reliable execution, supported by an integrated equipment fleet and a technically trained workforce. MINPRO's operational scale and project delivery record position it as a stable partner for long-term mine development programs.
- Mexgeo, founded in 2011 and based in Torreón, Coahuila, delivers underground development, exploration support, and civil works supported by a technically experienced team with deep mining industry tenure. Mexgeo emphasizes disciplined project management, value-driven execution, and safety, offering an integrated service model that supports sustainable and efficient mine development.

Together, MINPRO and Mexgeo bring complementary technical capabilities and a proven operational track record to the restart program at La Parrilla.

Drilling Update at Filo Sur Project – 4 Rigs Drilling Multiple Porphyry and Epithermal Targets in the Vicuña District, Argentina-Chile

April 8, 2026– Mogotes Metals Inc. (TSXV: MOG, FSE:OY4, OTCQB: MOGMF) ("**Mogotes**", or the "**Company**") is pleased to announce that four drill rigs are currently drilling multiple porphyry and epithermal targets at the Company's Mogotes Filo Sur project, that adjoins the southern limit of the large BHP / Lundin Filo Del Sol Copper-Gold-Silver resource in the Vicuña district[1].**(Figure 1).**

Figure 1: Current drilling progress at the Filo Sur Project

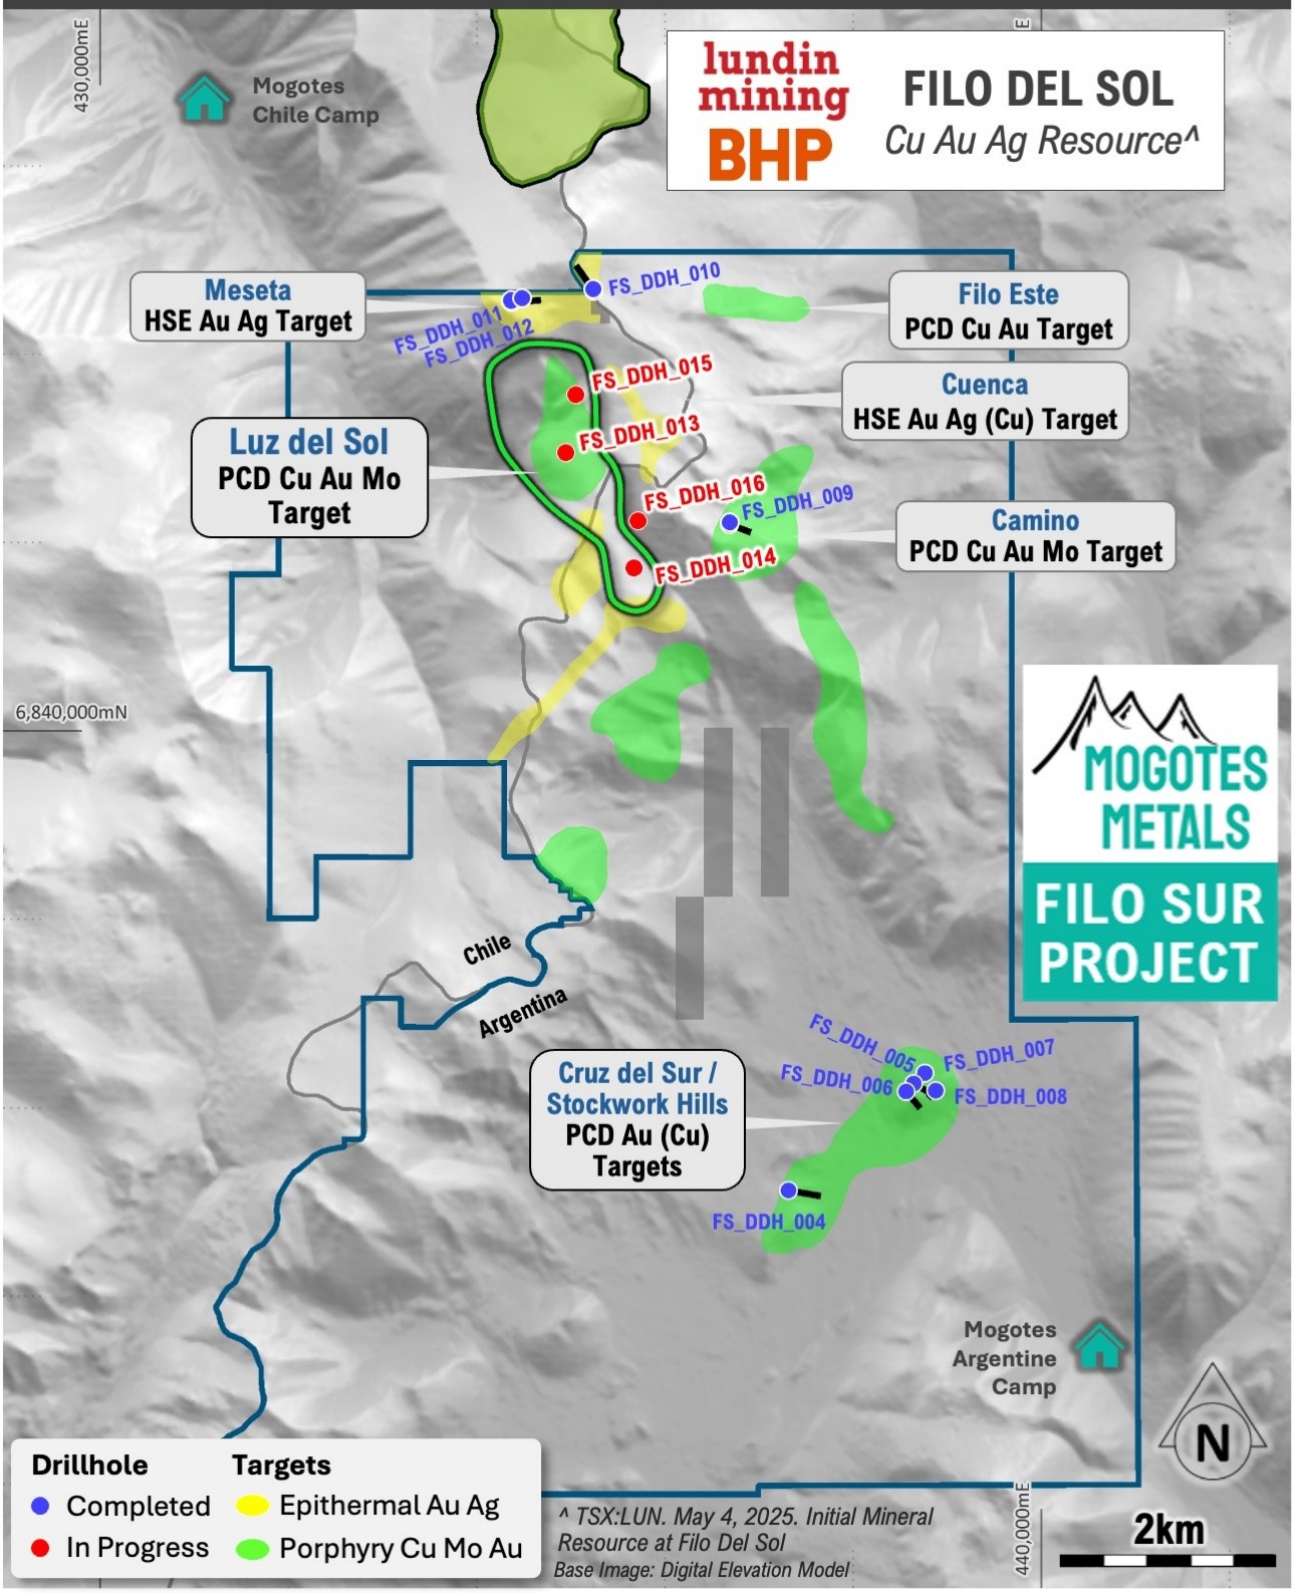

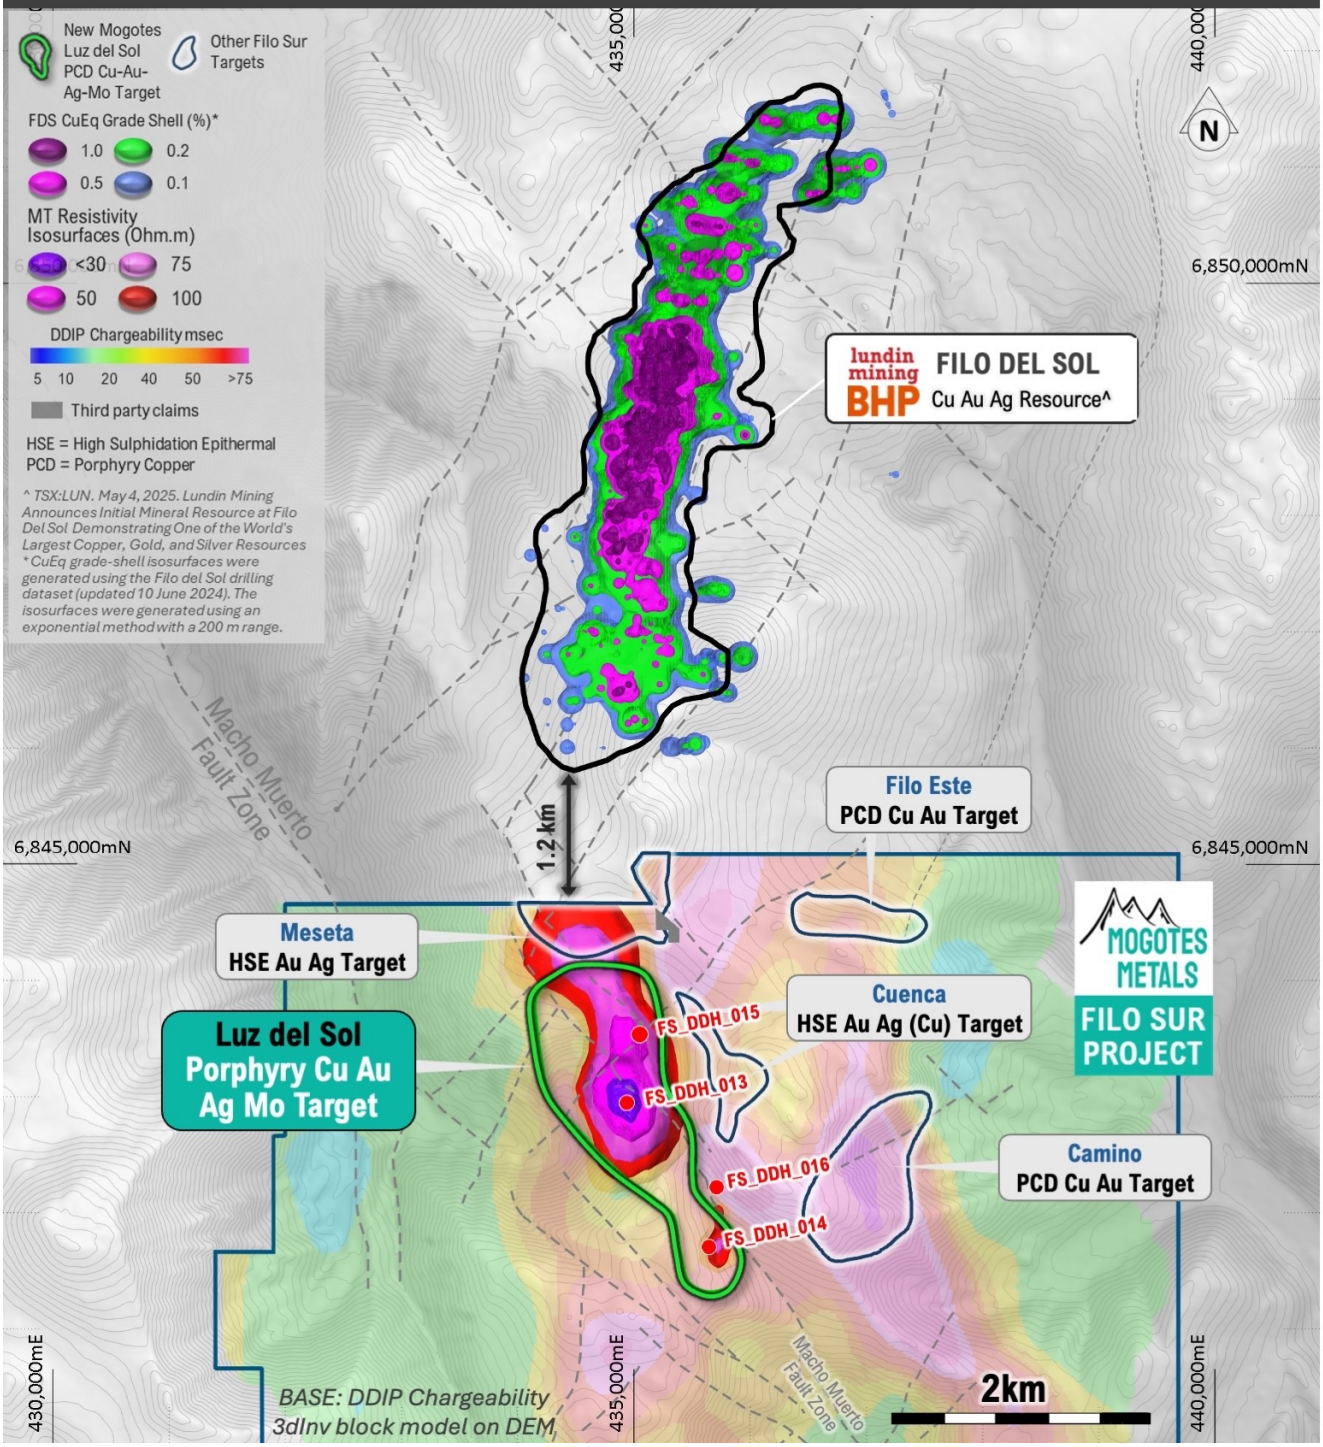

Figure 2: New Mogotes Luz del Sol Porphyry Cu-Au-Ag-Mo Target on Filo del Sol Trend

CEO of Mogotes Allen Sabet commented:

“Four rigs are now drilling simultaneously on both sides of the border, the largest program we’ve undertaken at Filo Sur and a step-change for the Company.

“Two rigs are testing large scale porphyry and high sulfidation targets at our priority Luz del Sol prospect in Chile, while the remaining two rigs simultaneously test targets on the Argentine side.

“Our integrated geophysical modelling has identified a 3.25 kilometre conductive trend at Luz del Sol that we believe may represent a porphyry system in the prospective Vicuña district.

“We are fully funded through this field season and expect to begin reporting initial assay results from the southern targets within the coming weeks, with Luz del Sol results to follow as drilling progresses.”

Update on pending results

Initial results from the southern cluster of targets at Cruz del Sur and Stockwork Hills are pending from the lab and are

expected to arrive in the coming weeks.

Mining Review 22nd March 2026

Mining Review 22nd March 2026

An absolutely horrendous week for investors in the mining space, with the price of gold falling a whopping 11% in a

week, and silver down 16%.

Mining companies' shares were clobbered on the market, despite some releasing excellent results, the market was unforgiving and merciless.

City Investors Circle Mining Review 22nd March 2026

An absolutely horrendous week for investors in the mining space, with the price of gold falling a whopping 11% in a week, and silver down 16%.

Mining companies' shares were clobbered on the market, despite some releasing excellent results, the market was unforgiving and merciless.

This was my worst ever week as an investor, where my stocks

were virtually all marked down severely as a result of a falling gold price. Some have fallen 33% in a couple of weeks despite producing gold and complying to their previously announced guidance, and despite the geopolitical events ongoing that would normally benefit the gold price, such as the Iran war.

Gold is, in fact, still UP on a year to date basis, it's sentiment that has changed, and I wonder what the ctatalyst will be to break the falling price?

+++++++

I attended the Swiss Mining Conference in Zurich this week, and companies present were putting a brave face on their falling shareprices, but the mood was fairly sombre and a few were even non-attendees.

I met some decent new stories and continue to research both new and existing holdings to make up a by list for when the market turns, which it will do at some point, it always does.

Swiss Mining Conference Day 2

Swiss Mining Conference Day 2

The second and last day of the conference was overshadowed by the news that gold had dropped sharply overnight, and silver was down 10%. Not the greatest news to greet a room full of mostly gold and silver mining companies.

I focused on new companies today and had a couple of nice surprises amongst my eight meetings.

City Investors Circle

Swiss Mining Conference Day 2

The second and last day of the conference was overshadowed by the news that gold had dropped sharply overnight, and silver was down 10%. Not the greatest news to greet a room full of mostly gold and silver companies.

I focused on new companies today and had a couple of nice surprises amongst my eight meetings.

I met **Awale Resources** first, an exploration company in the Ivory Coast, with a free carry from Newmont on the xurrent exploration campaign. All is going well but the resources may not be large enough to interest Newmont beyond the exploration phase, and Awale may well regain 100% control of the project in due course.

I had a first meeting with **Erdene Resource Development,** a producing gold miner based in Mongolia, with a string of copper – gold – moly projects in a prolific area. The idea is to use the revenues from gold production to fund the exploration of the larger copper moly projects, just the sort of story I like.

Aftermath Silver are a company I have followed for a while but

they are too far from production for me to have an immediate interest.

Aftermath are a silver – copper- manganese story, and a PFS is due Q1 2027. Manganese is a critical metals as defined by the USA, so should gain the company some traction when further along the line to development and production.

My next meeting was a nice surprise, **St. George Mining,** with a Niobium project , Araxa, in a prolific niobium area in Brazil, where 80% of the current world supply comes from. There are only two other sources of the metal in the world, each producing around 10% of world supply.

This is a critical metal for strengthening steel, making it lighter, and giving it temperature resistant qualities. Clearly it has military uses.

St. George are in the process of installing a pilot plant in a local university to test the process and product quality, and create a techical hub for the benefit of the company and the university.

Capex is projected to be around US $100 million, and If things go well ,production could commence in Q4 2028.

I've put this on my personal watchlist and will add it to the website Tier 4 watchlist for early exploration stocks.

I also met **Montage Gold,** constructing the Kone Gold Mine in the Ivory Coast, which is around 50% complete. Quite a high market cap currently but if it falls with the lower gold price it may present an opportunity before production starts.

Last but not least was **Borealis Mining**, a company that has just commenced production at the Borealis Gold mine in Nevada. Production is slated to be around 15,000 – 20,000 ounces of gold in 2026.

Market cap is around C$182 million, which looks low for a

company commencing production in Nevada.

City Investors Circle Market Review December 2025

The highlighted company is **Fuerte Metals (TSX.V: FMT)**

An exciting year for mining investors is reviewed, highlighting the positive average gains made on all the site's four company watchlists, and the best performing mining companies during the past year.

The commodity that gained the most value during 2025 is a surprise, read the newsletter to find out the commodity concerned.

Other companies mentioned include **Orla Mining** and **Westgold**.

The main topic is the nominal all-time high price of gold, silver, and platinum.

After a brief wobble of the gold and silver prices they have bounced back and producing miners remain around recent highs.
