

# Barton Gold Complete Regional Soil Sampling Programs

**Barton Gold (ASX: BGD)**

Confirmed that the further soil geochemistry programs have been completed on two key regional targets.

A total of 501 samples (including duplicates) have been collected at Black Oak Tank and 308 over a combined area of ~29km<sup>2</sup> , with assay results expected to be received during October 2025.

## **Barton Gold Completes Additional Regional Soil Sampling Programs Testing**

# regional exploration targets in 'Stage 1' development area

**Gold Holdings Limited (ASX:BGD, FRA:BGD3, OTCQB:BGDFF)** (Barton or Company) is pleased to confirm that the further soil geochemistry programs have been completed on two key regional targets.

The 'Black Oak Tank' prospect is located on the northern margin of the Lake Labyrinth Shear Zone, on Exploration Licence (EL) 6210 at the Company's South Australian Tarcoola Gold Project (Tarcoola).

The '308' prospect is located to the northeast of the Company's Central Gawler Mill, on EL 6502, at the Company's South Australian Challenger Gold Project (Challenger).

A total of 501 samples (including duplicates) have been collected at Black Oak Tank and 308 over a combined area of ~29km<sup>2</sup>, with assay results expected to be received during October 2025.

## HIGHLIGHTS

- Soil sampling recently completed over ~1.9km<sup>2</sup> surrounding Tolmer high-grade silver discovery

- Additional ~23km<sup>2</sup> program completed at 'Black Oak Tank' prospect (Tarcoola Gold Project)
- Additional ~6km<sup>2</sup> program completed at '308' prospect ~20km northeast of Central Gawler Mill
- Tolmer, Black Oak Tank and 308 soil assay results expected during September & October 2025

**Barton Managing Director Alexander Scanlon said:**

*"With the core platforms now established for our planned 'Stage 1' operations at the Central Gawler Mill, and a subsequent 'Stage 2' expansion at Tunkillia, Barton will advance those projects in parallel while remaining focused on opportunities to more fully leverage that existing and planned future infrastructure in the future.*

*"Our unique regional infrastructure and operating platform provides multiple advantages in testing exploration targets and progressing development prospects.*

*"As this regional platform grows, we can play an increasingly active role in unlocking and accelerating value in previously isolated regional assets.*

*"Our recent Tolmer high-grade gold and silver discoveries,*

*and our proposed acquisition of Cobra Resources' Wudinna Gold Project, are strong examples of complementary exploration and development initiatives.*

*"These offers offers significant optionality to our 'Stage 1' Central Gawler Mill and planned 'Stage 2' Tunkillia mill, respectively."*

# Barton Gold Begins Drilling on High-Grade Gold & Silver Targets

**Barton Gold Holdings Limited** (ASX:BGD, FRA:BGD3, OTCQB:BGDFF) (Barton or Company) is pleased to confirm the start of a ~2,500m drilling program targeting high-grade gold and silver at its South Australian Tarcoola Gold Project (Tarcoola), plus ~500m scout drilling near its wholly owned Central Gawler Mill.

## HIGHLIGHTS

- Assay grades up to 17,600g/t Ag and 83.6g/t Au recently confirmed high-grade silver and gold discoveries at Tarcoola's 'Tolmer' prospect; Mar / Apr 2025 silver discovery holes included:

### Hole ID Interval Including:

TBAC130 6m @ 4,747 g/t Ag from 46 metres 1m @ 17,600 g/t Ag from 46 metres

TBM227 4m @ 1,417 g/t Ag from 9 metres 1m @ 3,790 g/t Ag from 9 metres

TBM228 14m @ 434 g/t Ag from 46 metres 1m @ 3,350 g/t Ag from 54 metres

**Commenting on the start of Tolmer drilling, Barton MD Alexander**

## Scanlon said:

*“Tolmer is an exciting new opportunity for Barton, with high-grade silver and gold zones emerging in parallel and shallow assays grading up to 17,600 g/t Ag and 83.6 g/t Au, respectively.*

*“We aim to map these out quickly, so we are also deploying our Portable PPB detect ORETM workflows to analyse, adapt and direct drilling in real time.*

*“We can also expand the initial program of ~2,500m where we see potential for high-value extensions.”*

**Barton Gold Reports 17,600g/t Silver Intersected at Tarcoola's Tolmer Prospect**

**[Barton Gold \(ASX:BGD\)](#)**

Announced further high-grade assays from the Tolmer prospect at its South Australian Tarcoola Gold Project, where recent assays have confirmed high-grade gold and silver mineralisation.

Additional multi-element assays have identified further near surface mineralisation grading up to 17,600 g/t silver.

## **Barton Gold Reports 17,600g/t Silver Intersected at Tarcoola's Tolmer Prospect**

*28,000 gram-metres silver drilled less than 50 metres from surface*

**Barton Gold** (ASX:BGD, FRA:BGD3, OTCQB:BGDFF) (Barton or Company) is pleased to announce further high-grade assays from the Tolmer prospect (Tolmer) at its South Australian Tarcoola Gold Project (Tarcoola), where recent assays have confirmed high-grade gold and silver mineralisation.

Additional multi-element assays have identified further near surface mineralisation grading up to 17,600 g/t Ag.

These assays also suggest the potential for new styles of high-grade mineralisation at Tolmer, with the highest-grade silver assays appearing

independent of gold and within a broad halo of anomalous lead mineralisation.

## HIGHLIGHTS

- High-grade silver recently identified within Tarcoola Project's new 'Tolmer' gold system

- Additional shallow aircore (AC) drilling results have returned further high-grade silver in association with a broad zone of anomalous lead, with new significant assays including:

Hole ID Interval / [depth] Including:

TBAC102 11m @ 0.73 g/t Au and 165 g/t Ag [9m] 3m @ 2.28 g/t Au and 439 g/t Ag [16m] TBAC130 17m @ <0.02 g/t Au\* and 109 g/t Ag [7m]

6m @ <0.02 g/t Au\* and 4,747 g/t Ag [46m]

3m @ 314 g/t Ag [9m]

1m @ 17,600 g/t Ag [46m]

\* Note: field-based gold (Au) assays below detection limit of 0.02 g/t Au

- Previous significant gold and silver assays from Tolmer reverse circulation (RC) drilling include:1

Hole ID Interval / [depth] Including:

TBM0145 1m @ 2.16 g/t Au and 241 g/t Ag [79m]

TBM0161 4m @ 24.6 g/t Au and 82.8 g/t Ag [95m] 1m @ 83.6 g/t Au and 312 g/t Ag [97m]

- Gold and silver assays for 2,230m Tolmer reverse circulation (RC) drilling remain outstanding

## Commenting on Tolmer's latest high-grade silver assays, Barton MD Alexander Scanlon said:

*"This is an exciting addition to our recent Tolmer discovery.*

*"This style of silver-dominant mineralisation appears to be previously unrecognised in the Tarcoola Goldfield, and the best intersection of 6m @ 4,747 g/t silver sits within 50 metres of surface – shallower than our neighbouring historical high-grade Perseverance Mine.*

*"That 6m @ 4,747 g/t silver intersection also sits within the transitional zone between the oxidised and fresh domains.*

*"The AC drilling was unable to penetrate the underlying hard quartzite fresh rock, and we have already completed 2,230 metres of RC drilling to test for extensions of gold and silver mineralisation below this horizon.*

*"Assays for the follow up RC drilling are expected shortly. We look forward to sharing the results."*

ASX Announcement  
6 February 2025

# **Barton Gold 2,200m Follow-up Drilling Complete at Tolmer Au-Ag Discovery Testing strike extensions near grades of 83.6 g/t Au and 312 g/t Ag**

**Barton Gold Holdings Limited (ASX:BGD, FRA:BGD3, OTCQB:BGDFF)** (Barton or Company) is pleased to confirm that further RC drilling has been completed at the Tarcoola Gold Project's (Tarcoola) Tolmer prospect in South Australia.

17 RC holes were drilled for a total of 2,230 metres completed.

Drilling targeted potential extensions of higher-grade quartz sulphide veining, and below November 2024 aircore (AC) drilling which intersected gold but was unable to penetrate the underlying harder quartzite rock.

## **HIGHLIGHTS**

- Significant gold and silver assays from May – July 2024 RC drilling include assays of 4m @ 24.6 g/t Au and 82.8 g/t Ag from 95m depth (incl. 1m @ 83.6 g/t Au and 312 g/t Ag from 97m)
- Silver assays also remain outstanding for ~2,000m aircore (AC) drilling during November 2024

**Commenting on the recent drilling Barton MD Alexander Scanlon said:**

*“We are excited to quickly follow up drilling at the Tolmer prospect, having recently identified high-grade silver alongside the previously reported high-grade gold intercepts.*

*“We are also looking forward to receiving the results of further silver assays from our November 2024 aircore drilling, which are now underway.”*

# **Barton Gold High Grade Assays Confirm New Tolmer Gold System**

**[Barton Gold \(ASX:BGD\)](#)**

Announced high-grade assays from the Tarcoola Goldfield at the Tarcoola Gold Project in South Australia.

<b>Barton Gold</b>	<b>ASX: BGD</b>
<b>Stage</b>	<b>Production, development</b>
<b>Metals</b>	<b>Gold</b>
<b>Market Cap</b>	<b>A\$55 Million @ 25c</b>
<b>Location</b>	<b>South Australia</b>
<b>Website</b>	<a href="http://www.bartongold.com.au">www.bartongold.com.au</a>

# Barton Gold High Grade Assays Confirm New Tolmer Gold System

Significant alteration zone with shallow quartz sulphide veining

Barton Gold Holdings Limited (ASX:BGD, FRA:BGD3, OTCQB:BGDFF) (Barton or Company) is pleased to announce high-grade assays from the Tarcoola Goldfield at the Tarcoola Gold Project (Tarcoola) in South Australia.

Assays have now confirmed a new gold mineralised system at Tolmer, comprised of quartz veining within a broader zone of alteration.

Further Perseverance Mine assays remain outstanding.

## HIGHLIGHTS

- Recent seismic survey mapped several new and untested structures across the historical high-grade Tarcoola Goldfield, and identified key targets for 'repeats' of the Perseverance gold system
- During May-July 2024 Barton completed ~10,000m reverse circulation (RC) drilling to validate its structural interpretation, and target further mineralisation in the Perseverance open pit mine
- New high-grade assay results have confirmed a newly interpreted gold mineralised system at Tolmer, comprised of

quartz sulphide veining hosted within broader zones of alteration

- **New significant assay results include:**

Hole ID	Interval (m)	Grade (g/t Au)	Depth (m)	Target Area
---------	--------------	----------------	-----------	-------------

TBM0131	2 @ 2.55	from 100	Old Flame	
---------	----------	----------	-----------	--

TBM0135	7 @ 1.60	from 56	Old Flame	
---------	----------	---------	-----------	--

TBM0148	9 @ 3.92	from 202	Tolmer	
---------	----------	----------	--------	--

TBM0154	1 @ 6.20	from 88	Tolmer	
---------	----------	---------	--------	--

TBM0161	4 @ 24.6	from 95	Tolmer	
---------	----------	---------	--------	--

TBM0162	5 @ 3.15	from 97	Tolmer	
---------	----------	---------	--------	--

TBM0163	2 @ 2.71	from 20	Tolmer	
---------	----------	---------	--------	--

TBM0181	14 @ 1.41	from 80	Tolmer	
---------	-----------	---------	--------	--

TBM0171	3 @ 11.6	from 78	Warburton	
---------	----------	---------	-----------	--

- Additional Perseverance Mine open pit floor drilling assays outstanding.

## **Commenting on the latest Tarcoola exploration drilling results, Barton MD Alexander Scanlon said:**

*“We are excited to confirm that the first significant test of Tarcoola’s new structural model has confirmed a new gold mineralised system at Tolmer.*

*“We have also successfully intersected high-grade mineralisation at multiple other targets, demonstrating Tarcoola’s broader potential to host multiple shallow, high-grade gold zones.*

*“We are also awaiting further assay results from the open pit Perseverance Mine, where we are hoping to convert further shallow mineralisation in the pit floor into additional high-grade Resources for a ‘Stage 1’ operation.*

*“This is another step toward the realisation of our lower-cost, lower-risk development strategy leveraging our existing processing infrastructure, and we are only just scratching the surface of the broader regional potential.”*
