Barton Gold Extends Tolmer Silver Discovery

Barton Gold (ASX: BGD)

Announced further shallow, broad and high-grade assays at its South Australian Tolmer Silver discovery.

Tolmer is located at its Tarcoola Gold Project , where during 2025 Barton announced one of Australia's highest-grade modern silver discoveries with an intersection of 6m @ 4,747 g/t Ag from only 46m depth.

Barton Gold Extends Tolmer Silver Discovery – Numerous High-Grade Assays

Multiple new >2,000g-m Ag assays; metallurgical testwork to begin

Barton Gold Holdings Limited (ASX:BGD, OTC:BGDFF, FRA:BGD3) (Barton or Company) is pleased to announce further shallow, broad and high-grade assays at its South Australian Tolmer Silver discovery (Tolmer).

Tolmer is located at its Tarcoola Gold Project (Tarcoola), where during 2025 Barton announced one of Australia's highest-grade modern silver discoveries with an intersection of 6m @ 4,747 g/t Ag from only 46m depth.

These assays have further infilled Tolmer's shallow, high-grade 'western silver zone' mineralisation and extended it to over 500m strike, also yielding broad high-grade intersections in the ‘eastern gold zone’.

HIGHLIGHTS

• Recent 3,677m drilling program targeted infill and extension of high-grade Tolmer silver discovery, after preliminary testwork yielded a high-grade concentrate grading over 100,000 g/t Ag (10% silver)
• New high-grade assays infill Tolmer’s ‘western silver zone’ and extend its strike to over 500m, while also adding broad, high-grade intersections to the ‘eastern gold zone’. These include:
Hole ID Interval Including:
TBM0258 10m @ 399 g/t Ag & 0.55 g/t Au from 56m 4m @ 954 g/t Ag & 1.23 g/t Au from 56m TBM0259 16m @ 120 g/t Ag from 5m, and
16m @ 493 g/t Ag & 0.66 g/t Au from 50m
5m @ 282 g/t Ag from 5m

Commenting on the Tolmer drilling results, Barton MD Alexander Scanlon said:

> *“Our South Australian Tolmer silver discovery continues to yield broad, high-grade silver assays across an expanding footprint.*

> *“With a shallow profile and having produced trial concentrates grading over 100,000 g/t Ag, Tolmer is already hinting at real potential for a low-cost, high-margin operation.*

“We will share our further analysis in due course.

“We are also planning to update our 3.1 million ounce Tunkillia silver Resource, where 58,000m drilling was recently completed to support JORC upgrades, a Pre-Feasibility study, a Mining Lease application and financing discussions.

“Barton’s Tolmer and Tunkillia silver assets are emerging as potentially significant contributors to our South Australian precious metals strategy, whether developed as a complement to our regional gold holdings or on a standalone basis.”

Barton Gold Tarcoola Goldfield Drilling Restarts

Barton Gold (ASX:BGD)

Confirmed that its current ~7,000m drilling program in the Tarcoola Goldfield has restarted.

The program is testing new structural targets near the Perseverance Mine.

Barton Gold Tarcoola Goldfield Drilling Restarts

Barton Gold Holdings Limited (ASX:BGD, OTCQB:BGDFF, FRA:BGD3) (Barton or the Company) is pleased to confirm that its current ~7,000m drilling program in the Tarcoola Goldfield (Tarcoola) has restarted.

The program is testing new structural targets near the Perseverance Mine.

3,126m RC drilling was completed between 14 May and 3 June 2024, with priority assay samples dispatched for fire assay analysis. Drilling has now restarted on priority targets including Tolmer, Mulgathing and Warburton.

HIGHLIGHTS

- ~7,000m reverse circulation (RC) drilling program restarts, targeting high-grade mineralisation in newly identified structural targets surrounding the historical high-grade Perseverance Mine.

Commenting on the Tarcoola drilling program, Barton MD Alex Scanlon said:

“We are excited to get drilling again on some of our highest priority targets for potential high-grade Tarcoola mineralisation.

“With priority samples already in the lab we are aiming to complete this initial program quickly, and then start preparing for potential follow up drilling on these targets, and others.”
