

Omai Gold Increases Indicated Mineral Resources to 2.5m oz Au

[Omai Gold Mines \(TSX.V: OMG\)](#)

Announced an updated Mineral Resource Estimate on its 100%-owned Omai Gold Property in Guyana.

The MRE includes expansions to both the Wenot Deposit and Gilt Deposit. Most significantly, the Wenot Indicated MRE increased 49.8% to 1,453,000 ounces of gold with an average grade of 1.59 g/t Au.

Omai Gold Increases Indicated Mineral Resources to 2.5M oz Au at 2.04g/t Au (38.1Mt) and Inferred to 5.5Moz Au at 1.59g/t Au (106.6Mt) with Expansion of Wenot and Gilt Deposits

Toronto, Ontario – (April 14, 2026) – [Omai Gold Mines Corp. \(TSXV: OMG\)](#) (OTCQB: OMGGF) (“Omai Gold” or the “Company”) is pleased to announce an updated Mineral Resource Estimate (“MRE”) on its 100%-owned Omai Gold Property in Guyana.

The MRE includes expansions to both the Wenot Deposit and Gilt Deposit. Most significantly, the Wenot Indicated MRE increased 49.8% to 1,453,000 ounces (“oz”) of gold with an average grade of 1.59 g/t Au, contained in 28.4 million tonnes (“Mt”) and the Wenot Inferred MRE increased 7.6% to 3,999,000 oz grading 1.35 g/t Au, contained in 92.4 Mt. Similarly, the adjacent Gilt Deposit saw an overall increase in ounces over the previous MRE.

Gilt's Inferred MRE increased 120% to 1,465,000 oz averaging 3.22 g/t Au (in 14.2 Mt), while the Indicated MRE decreased by 9.5% to 1,042,000 oz averaging 3.33 g/t Au (in 9.7 Mt).

HIGHLIGHTS:

The Omai Gold Property hosts two orogenic gold deposits: the shear-hosted Wenot Deposit and the adjacent, intrusion-hosted Gilt Deposit with a combined updated MRE (over the August 2025 MRE) of:

- 2,495,000 ounces of gold (Indicated MRE), a 17.6% increase, averaging 2.04 g/t Au in 38.1 Mt and
- 5,465,000 ounces of gold (Inferred MRE), a 24.7% increase, averaging 1.59 g/t Au in 106.6 Mt Wenot Deposit (a constrained pit approach with minor underground is applied)
- 1,453,000 oz of gold in 28.4 Mt (Indicated), a 49.8% increase in ounces (+483,000 oz) over the August 2025 MRE1
- 3,999,000 oz of gold in 92.4 Mt (Inferred), a 7.6% increase in ounces (+282,000 oz)
- 1.59 g/t Au grade of Indicated MRE, an 8.9% increase (from 1.46 g/t Au)
- 1.35 g/t Au grade of Inferred MRE, a 25.8% decrease (from 1.82 g/t Au)
- Increased gold price assumption to \$3,000/oz from \$2,500/oz at the same cut-off of 0.30 g/t Au Gilt Deposit (an underground mining approach is applied)
- 1,042,000 oz of gold (Indicated) averaging 3.33 g/t Au, in 9.7 Mt, a 9.5% decrease in ounces (-109,000) over the August 2025 MRE
- 1,465,000 oz of gold (Inferred) averaging 3.22 g/t Au, in 14.2 Mt, a 120.3% increase in ounces (+800,000 oz)
- 3.33 g/t Au grade of Indicated MRE, a 3.4% increase (from 3.22 g/t Au)

- 3.22 g/t Au grade of Inferred MRE, a 3.9% decrease (from 3.35 g/t Au)
- Increased gold price assumption to \$3,000/oz from \$2,500/oz and increased cut-off to 1.7 g/t Au from 1.5 g/t Au

Elaine Ellingham, President & CEO commented,

“We are pleased to be delivering yet another very substantial increase to the Mineral Resource Estimate for our Omai Gold Project in Guyana.

“This reinforces Omai’s position as the largest gold project in Guyana.

“Omai’s unique road access and location just ten kilometres from Guyana’s main road that connects to the two largest towns in Guyana and to northern Brazil, will continue to simplify logistics as the project advances.

“Omai’s legacy benefits include an on-site airstrip, a cleared site, known metallurgical recoveries, and established tailings sites.

“In addition to these unique advantages for developing a large-scale gold deposit, Guyana is proving to be a

favourable jurisdiction for permitting with Government and communities' support for large-scale mine development.

"This, our 5th Mineral Resource Estimate, again reinforces the potential for large-scale mine redevelopment at Omai. The Omai team's dedication has continued to deliver superior value creation for all stakeholders.

"With each successive milestone it becomes even clearer that Omai has the potential to be a multi-decade large-scale gold mining operation.

"Notwithstanding this large gold Mineral Resource Estimate, we still see very significant potential to further expand the gold mineralization at both the Wenot and the Gilt Deposits. Both are open to depth and the deep hole drilled under Wenot in 2025 (250DD-122W) established the presence of the Wenot shear (hosting 7 gold zones) a full 700 m below the known Wenot deposit.

*"A 50,000 m drill program has commenced with five drills turning. Our next major catalyst is the Preliminary Economic Assessment ("PEA"), **expected to be completed in 2 to 3 months.***

"We are continuing to aggressively drill to increase the Mineral Resources and to upgrade the Inferred Resources, as we set our sights on a future Prefeasibility or Feasibility Study. Drilling is now focused on the Wenot deposit and on certain nearby targets."

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com

Omai Gold Intersects 7.74 g/t Au over 13.5m at Wenot

[Omai Gold Mines \(TSXV: OMG\)](#)

Announced assay results from eight additional drill holes from the recent drill program at its 100% owned Omai Gold Project in Guyana, South America.

Five of the eight holes were collared in West Wenot, two in Central Wenot and one at the east end of the Wenot deposit. All holes intersected multiple zones of gold mineralization.

Omai Gold Intersects 7.74 g/t Au over 13.5m and 6.30 g/t Au over 9.8m at Wenot and Commences Drilling Exploration Target

Toronto, Ontario – (March 26, 2026) – [Omai Gold Mines Corp. \(TSXV: OMG\)](#) (OTCQB: OMGGF) (“Omai Gold” or the “Company”) is pleased to announce assay results from eight additional drill holes from the recent drill program at its 100% owned Omai Gold Project in Guyana, South America.

Five of the eight holes were collared in West Wenot, two in Central Wenot and one at the east end of the Wenot deposit. All holes intersected multiple zones of gold mineralization.

The objective of these holes was to fill gaps within the broader Wenot deposit, to convert some mineralized areas to the higher “indicated” confidence level and to provide further testing of the limits of the Wenot gold system.

The holes at West Wenot showed continued significant gold mineralization within the southern sediments.

Five diamond drill rigs are now drilling on the Wenot deposit, all working on a series of holes at the northeast portion of Wenot. These are focused on the prolific Dike Corridor at depths between -150 to -400m (the DC holes), in areas not previously tested. As these holes are collared further to the north, they will also explore potential northern splays.

Early next week, one drill rig will be deployed to test an intriguing geophysical anomaly known as “the Handle” that corresponds to a magnetic high trending northeast off of the Wenot deposit.

An additional drill rig will also commence an additional two holes stepping out on the East Wenot target area.

Highlights* from the recent drilling include:

- Hole 250DD-158
 - o 7.74 g/t Au over 13.5m
 - o Including 28.03 g/t Au over 3.1m
 - o 1.45 g/t Au over 44.4m

Elaine Ellingham, President and CEO commented:

“As these drill results continue to add to the confidence in Omai as a Tier 1 gold asset, we are advancing many aspects of work towards the next stages for the project.

“The Company is expecting the completion of its updated Mineral Resource Estimate (MRE) within the next couple of weeks and the Preliminary Economic Assessment (PEA) is

expected a couple months following completion of the MRE.

“We have already set our sights on the work that will advance us towards a Pre-Feasibility or Feasibility Study. Metallurgical work, tailings studies and the important permitting initiatives are front and centre.

“At the same time, we will continue our very aggressive drill program with a focus on upgrading the large Wenot resource, extending the limits and testing certain priority exploration targets.”
