Wesdome Intersects 7.8 g/t Gold over 57.2 Metres at Kiena Deep, Confirming the Norbenite Footwall Zone; Discovers a New Zone Near Infrastructure

Toronto, Ontario–(Newsfile Corp. – September 10, 2026) – **Wesdome Gold Mines Ltd. (TSX: WDO)**(OTCQX: WDOFF) ("**Wesdome**" or the "**Company**") today provides an update on its exploration drilling activities at its wholly-owned Kiena mine ("**Kiena**") near Val-d'Or, Quebec.

HIGHLIGHTS

Norbenite Footwall Zone Confirmed

- A third broad intercept solidifies the recently announced discovery of the Norbenite Footwall Zone.
  - N134-7207: 7.8 g/t Au uncapped over 57.2 m core length, (7.4 g/t Au capped, 57.2 m core length).
- Together with two prior holes – hole N134-7152W1 that intersected 6.9 g/t Au uncapped over 42.1 metres and historic hole 6752W10 that intersected 9.9 g/t Au over 83.2 metres – the Norbenite Footwall Zone now traces

over 150 metres vertically with significant thickness and grade.
- Drilling at depth continues to delineate the new Norbenite Footwall Zone beyond the Norbenite Fault where mineralization has been traced over at least 150 vertical metres in basaltic rock and remains open up-plunge, laterally, and at depth, highlighting significant growth potential.

VZ Zone and VZ Parallel Vein Discovery

- The new VZ Zone opens a previously untested parallel trend less than 100 metres from existing infrastructure, with six holes confirming continuity.
- One exploration hole intersected a new parallel mineralized vein adjacent to the VZ Zone and less than 50 metres from existing infrastructure.
  - N109-7213: 23.8 g/t Au uncapped over 4.0 m core length (23.8 g/t Au capped, 4.0 m core length)

Anthea Bath, President and Chief Executive Officer, commented,

“These latest positive results are meaningfully shifting how we think about the potential scale of Kiena Deep.

“The results provide growing evidence that the area hosts multiple recurring high-grade structures beyond the mineralized zones currently included in our resource model.

However, the full extent and ultimate scale of the mineralized system remain to be determined.

“Further growth of these zones has the potential to increase ounces per vertical metre, create new mining areas, and substantially change how we view the future scale and configuration of the mine.”

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
