

Lahontan Gold Drills Thick, Shallow Gold at York and Slab

Lahontan Gold (TSX.V:LG)

Announced the first results from the 2025 Phase Two drilling program at the Company’s flagship Santa Fe Mine Project located in Nevada’s prolific Walker Lane.

Lahontan has received analytical results for six reverse-circulation rotary (“RC”) drill holes totaling 994 metres.

LAHONTAN DRILLS THICK, SHALLOW GOLD: 114m GRADING 0.33 g/t Au Eq at YORK; 23m GRADING 0.42 g/t Au Eq at SLAB

Toronto Ontario, January 13, 2026 – **Lahontan Gold Corp.** (TSX.V:LG, OTCQB:LGCXF) (the “Company” or “Lahontan”) is pleased to announce the first results from our 2025 Phase Two drilling program at the Company’s flagship Santa Fe Mine Project located in Nevada’s prolific Walker Lane.

Lahontan has received analytical results for six reverse-circulation rotary (“RC”) drill holes totaling 994 metres.

Significant results include:

- York: 114.3 metres (76.2 – 190.5m) grading 0.33 g/t Au Eq in YOR25-004R including 18.3 metres (172.2 – 190.5m) grading 0.90 g/t Au Eq: A shallow, thick, intercept of gold mineralization that expands the footprint of the York gold zone to the north

of the current mineral resource pit shell*, leaving gold mineralization open and unconstrained to the north by modern drilling

- Slab: 22.9 metres (19.8 – 42.7m) grading 0.42 g/t Au Eq in CAL25-009R: Very shallow oxide gold that may pull the Slab pit shell deeper in an updated Mineral Resource Estimate (“MRE”) expected later this year (please plan map for drill hole locations below).

- Slab: 29.0 metres (97.5 – 126.5m) grading 0.26 g/t Au Eq in CAL25-010R: Oxide gold mineralization below the current mineral resource pit shell, an additional opportunity to potentially deepen the Slab conceptual pit shell and capture additional gold resources in the MRE update.

Kimberly Ann, Lahontan Executive Chair, President, CEO, and Founder commented:

“The Lahontan team is excited to receive the first analytical results from our Phase Two 2025 drill program at Santa Fe.

“The drill results at York reinforce our interpretation that the York deposit continues to the north of the previously defined MRE and provides an excellent opportunity to further expand gold Mineral Resources at York.*

“At Slab, the two drill holes targeting deeper extensions to known shallow oxide gold and silver mineralization were very successful; these drill results will be incorporated into an updated MRE for the entire Santa Fe Mine project, expected in the coming months.

“We will be receiving additional analytical results for seven drill holes at Santa Fe and six drill holes at our West Santa Fe project over the coming weeks, so please stay tuned for further press releases!”

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
