

Thor Mining's Kapunda copper project partner commences testing of in situ recovery

Thor Mining {ASX / AIM: THR}

Thor's associate partner in the Kapunda copper project in South Australia, EnviroCopper, has started field pumping tests.

EnviroCopper can earn up to 75% of the rights over metals produced by in-situ recovery at Kapunda, and Thor holds 25% of EnviroCopper, with an option to increase to 30%.

Thor Mining {ASX / AIM: THR}

Thor's associate partner in the Kapunda copper project in South Australia, EnviroCopper, has started field pumping tests.

EnviroCopper can earn up to 75% of the rights over metals produced by in-situ recovery at Kapunda, and Thor holds 25% of EnviroCopper, with an option to increase to 30%.

The testwork program is being funded by a government grant of AUS\$2.85mln.

The drill samples will be assayed for copper, gold, and other elements, and the mineralised samples will also be used for further column leach test work.
