The glory hole was  $14m \oplus 4.58 \text{ g/t}$  Au from  $103m \text{ including } 1m \oplus 41.80\text{g/t}$  from 105m.

Tyranna Resources {ASX: TYX}

Released high grade drill results from their Eureka drill program. The glory hole was  $14m \ @ 4.58 \ g/t \ Au \ from 103m including <math>1m \ @ 41.80g/t \ from \ 105m$ .

The drilling program, comprising 2,040 metres for 13 holes, was successful in intersecting the high-grade ore shoot beneath the recently completed open pit.

Diamond drilling was designed to target the interpreted south plunging ore shoot that had been mined in the pit by the previous owners.
