Uranium Energy Corp CEO Amir Adnani is featured in a new presentation focused on the increasing price of uranium

Uranium Energy Corp. (NYSE: UEC) CEO Amir Adnani has recorded a new interview in the wake of the sudden surge in the uranium price in the last two weeks.

UEC's Texas in situ recovery plant in Texas has been shut in due to the low price, but that may be about to change.

The price of uranium has soared around 40% in short order as it's confirmed as a "green" metal. Certainly less polluting than the alternatives in the energy sector such as oil and gas, but that comes with a certain risk of course.

The fully operational Hobson Processing Plant is an in-situ recovery (ISR) uranium processing plant, located about 100 miles northwest of Corpus Christi in Karnes County, Texas.

Hobson was originally licensed and constructed in 1978, and was subsequently completely refurbished in 2008. The plant is designed to process uranium-loaded resins from satellite mines to a final product, U_3O_8 .

The Hobson Processing Plant is central to all of UEC's in-situ recovery in South Texas, including the Palangana mine, the fully permitted Burke Hollow and Goliad projects, as well as two other South Texas projects in the pipeline.
