

# Watchlists

## City Investors Circle – Company watchlists.

The following companies listed on the watchlists below are not recommendations in any shape or form, they are companies we follow because they have presented to our group in London, or that we personally like because they fit our own particular investment criteria.

Always do your own research and consult an investment professional.

The watchlists are tiered, **Tier 1** being producing miners, **Tier 2** early stage production / late stage development projects, **Tier 3** advanced exploration projects, and **Tier 4**, early stage exploration projects.

**Tier 1 – Producing mining companies, or awaiting M and A**
