Wesdome Intersects New Zone at Kiena's Dubuisson Deposit

Wesdome Gold Mines (TSX: WDO)

Announced a new mineralized zone at the Dubuisson deposit, located east of the Kiena Deep deposit at the Company's 100% owned Kiena Mine Complex in Val-d'Or, Québec.

The new zone has been intersected by drill hole DB-25-068, returning 4.1 g/t Au (uncut) over 25.8 metres (core length).

Wesdome Intersects New Zone at Kiena's Dubuisson Deposit

Returns 4.1 g/t Au (uncut) over 25.8 metres (core length) below current resource

TORONTO, Oct. 27, 2025 (GLOBE NEWSWIRE) — Wesdome Gold Mines Ltd. (TSX:WDO, OTCQX:WDOFF) ("Wesdome" or the "Company") is pleased to announce a new mineralized zone at the Dubuisson deposit, located east of the Kiena Deep deposit at the Company's 100% owned Kiena Mine Complex in Val-d'Or, Québec.

The new zone has been intersected by drill hole DB-25-068, returning 4.1 g/t Au (uncut) over 25.8 metres (core length).

Located approximately 100 metres below, and lateral to, the Dubuisson North Zone and currently interpreted to be between the Dubuisson North and South zones, this new zone represents a compelling opportunity to expand the Dubuisson deposit at depth.

The combined grade and thickness are particularly encouraging, as the intercept highlights the potential for future bulk-tonnage mineralization at Kiena.

Highlights

New Dubuisson Zone

Drilling confirms a new mineralized zone and resource expansion potential

- Hole DB-25-068: 4.1 g/t Au over 25.8 metres (from 410.4 metres, core length, uncapped)
  Including: 6.1 g/t Au over 6.1 metres (from 412.5 metres, core length, uncapped)

Anthea Bath, President and Chief Executive Officer, stated,

> *"This new mineralized zone underscores the strong potential for expansion at the Dubuisson deposit.*
>
> *"The intercept's grade, width, and proximity to existing infrastructure – within 350 metres of the Level 33 exploration drift – make it particularly significant.*
>
> *"Like the Shawkey South Zone, this area remains completely open at depth and exhibits strong geological similarities to the adjacent Goldex mine.*
>
> *"This style of mineralization is particularly exciting as it highlights the potential for bulk-tonnage underground deposits within our land package. While it's still early*

days, we are beginning to think about how such deposits could augment future production.”

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
