

West Red Lake Gold Reports 176.04 g/t Au over 5.3m

[West Red Lake Gold Mines \(TSX.V: WRLG\)](#)

Reported drill results from its 100% owned Madsen Mine located in the Red Lake Mining District of Northwestern Ontario, Canada.

Highlights included 176.04 g/t Au over 5.3m, 128.32 g/t Au over 4.5m and 35.72 g/t Au over 13.35m.

West Red Lake Gold Reports 176.04 g/t Au over 5.3m, 128.32 g/t Au over 4.5m and 35.72 g/t Au over 13.35m from Austin 955 and 904 Complexes

September 22, 2026 – Vancouver, BC – **West Red Lake Gold Mines Ltd.** (“West Red Lake Gold” or “WRLG” or the “Company”) (**TSXV: WRLG**) (OTCQX: WRLGF) is pleased to report drill results from its 100% owned Madsen Mine (the “Madsen Mine” or “Madsen”) located in the Red Lake Mining District of Northwestern Ontario, Canada.

Will Robinson, Vice President of Exploration, commented,

"We are pleased to announce another round of impressive assay results from our ongoing underground definition drill program at Madsen.

"The mineralized panels within the 904 and 955 complexes are holding together quite well with strong grades and continuity demonstrated across multiple areas.

"These results continue to build our confidence in the geological model and the potential for these areas to be integrated into the Madsen mine plan in 2027.

"Importantly, these complexes are located close to existing underground infrastructure, with the 904 complex representing non-remnant mineralization, meaning we are now advancing into fresh, previously unmined material, providing additional flexibility as we continue to define and advance mining inventory."

The **Austin 904** represents a unique opportunity within the Madsen deposit, comprising an **approximately 200m by 200m panel of intact gold mineralization that was not historically mined.**

This is rare for the Madsen deposit and places WRLG in a

favorable position to have full access to the entire mineralized zone for mining which is expected to **result in larger stopes and increased efficiency during design and extraction.**

DRILLING HIGHLIGHTS:

- **HoleMM26D-14-4929-025** intersected **5.3m @ 176.04 g/t Au**, including **1m @ 925.52 g/t Au**. This intercept was complemented by a large clot of **visible gold** associated with biotite alteration within a quartz-porphyry dike (Figure 1).

FIGURE 1. Visible gold showing in hole MM26D-14-4929-025 at 64.6m downhole depth.

- **HoleMM26D-13-4727-013** intersected **4.5m @ 128.32 g/t Au**, including **1m @ 566.81 g/t Au**. This intercept was complemented by **visible gold** associated with pyrrhotite, biotite alteration and quartz-carbonate veining (Figure

2).

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
