West Red Lake Gold Declares Commercial Production at Madsen Gold Mine

West Red Lake Gold Mines Ltd.(“West Red Lake Gold” or “WRLG” or the “Company”) (TSXV: WRLG)(OTCQX: WRLGF) is pleased to declare commercial production at its 100% owned Madsen Gold Mine, located in the Red Lake Mining District of Northwestern Ontario, Canada.

The Madsen Mine achieved commercial production as of January 1, 2026.

The mill averaged 689 tonnes per day (“tpd”) in December 2025. This represents 86% of permitted throughput of 800 tpd and meets the Company’s internal commercial production requirement of 30 consecutive days of mill throughput at 65% or greater of permitted capacity.

Operational stability, the other internal requirement, is also in place at Madsen. Consistent strong mill recoveries, which averaged 94.6% in December, enabled production of 3,215 ounces of gold.

Shane Williams, President and CEO said;

“We are delighted to announce commercial production at the Madsen Mine, achieved only seven months after completion of the bulk sample.

“Achieving commercial production is a major milestone for any producer and it comes after a strong December that saw tonnage, grade, recoveries, and production all perform to plan.

“Credit and gratitude go to the site operations team, who delivered a responsible and methodical mine ramp up. I also want to thank our partners the Lac Seul and Wabauskang First Nations and the community of Red Lake for their longstanding support.

“We will continue to ramp up from this strong base, and I anticipate Madsen will reach sustained permitted capacity by mid-2026.”

—-

For the first quarter (“Q1”) of 2026, mill feed will come predominantly from the 4447 area, the high-grade zone in South Austin that the Company defined in 2025. Mill feed is expected to average in excess of 6 grams per tonne gold (“g/t Au) in Q1.

In December the Madsen Mine produced 21,389 tonnes of ore,

which is an average of 689 tonnes per day. The tonnes carried an average grade of 4.94 g/t Au. Mill recovery of 94.6% over the month produced 3,215 ounces of gold in December.
