## **Shane Williams, President & CEO said;**

*"The high-grade panel of gold mineralization the team is currently defining and expanding in South Austin has been delivering exceptional grades and thicknesses.*

*"Archaean lode-gold vein systems like Madsen are well known for having pockets of mineralization that are often discrete, very high-grade and require tight-spaced drilling to properly define.*

*"The success we are having in South Austin with the underground definition program underscores the importance of getting the drills deeper in the system and into high priority areas of the deposit so that additional high-grade pockets and lenses can be discovered, drilled off and integrated into the mine plan."*
