## West Red Lake Gold Intersects 13.40 g/t Au over 10m and 12.21 g/t Au over 3m at North Austin Zone – Madsen Mine

**West Red Lake Gold Mines Ltd.** (“West Red Lake Gold” or “WRLG” or the “Company”) (**TSXV: WRLG**)(**OTCQB: WRLGF**) is pleased to report drill results from its 100% owned Madsen Mine located in the Red Lake Gold District of Northwestern Ontario, Canada.

This round of drill results from the Madsen Mine were all drilled from underground on the **North Austin Zone**, which represents a new area of high-grade mineralization extending the current Madsen resource to the northeast. This program was designed to expand the North Austin zone down-plunge and to the northeast.

The North Austin drilling update provided in this news release builds on the positive drill results previously announced

on [May 21, 2024](#) and [Feb 7, 2024](#).

The North Austin Zone sits adjacent to existing underground development marking it as a high caliber, near-surface target that could potentially be developed early during future mine restart and production.

The North Austin Zone remains open down-plunge and along strike to the northeast and will continue to be a priority expansion target as underground drilling continues.

## Shane Williams, President & CEO, stated,

*“The North Austin drilling continues to deliver meaningful results which is a testament not only to the quality of this resource area, but also to our technical team’s understanding of the structural controls and ore shoot geometries in this emerging part of the Madsen deposit.*

*“With the team now working towards a planned mine restart in the second half of 2025, the drills at Madsen will continue to delineate and define the high-value mineral inventory needed to support that objective.”*
