

West Red Lake Gold Drills

70.80 g/t Au over 8.3m

West Red Lake Gold Mines (TSX.V: WRLG)

Announced an update from the 2023 exploration drilling program on its Rowan Property, located in the prolific Red Lake Gold District of Northwestern Ontario, Canada.

Hole RLG-23-163B intersected 70.80 grams per tonne gold over 8.3 metres, including 1,120.19 g/t Au over 0.5 m.

West Red Lake Gold Drills 70.80 g/t Au over 8.3 m Including 1,120.19 g/t Au over 0.5 m at Rowan Property

West Red Lake Gold Mines Ltd. (TSX.V: WRLG) (“West Red Lake Gold” or “WRLG” or the “Company”)(OTCQB: WRLGF) is pleased to announce the following update from the 2023 exploration drilling program on its 100% owned Rowan Property located in the prolific Red Lake Gold District of Northwestern Ontario, Canada.

Hole RLG-23-163B intersected **70.80 grams per tonne (“g/t”)** gold (“Au”) over **8.3 metres(“m”)**, including **1,120.19 g/t Au** over **0.5 m**.

This hole represents the **highest-grade intercept ever drilled across the Rowan Property** and is a testament to the continued success our exploration team is achieving with the 2023 drilling campaign.

The drill program at Rowan has already been expanded from 17,000 m to 25,000 m, and these results only further validate the team's commitment to the Rowan asset.

HIGHLIGHTS:

- **Hole RLG-23-163B** Intersected **8.3m @ 70.80 g/t Au** in Vein Zone 101 from 387 m to 395.3 m, including **0.5 m @ 13.46 g/t Au** from 389 m to 389.5 m, **0.5 m @ 1,120.19 g/t Au** from 393.5 m to 394 m and **0.6 m @ 29.64 g/t Au** from 394.7 m to 395.3 m.
- This represents the **highest-grade intercept ever drilled across the Rowan Property**.
- The location of the pierce point on Vein 101 represents one of the deeper intercepts drilled within the high-grade East Zone which could be indicating that the vein system is increasing in grade and thickness with depth.
- The exploration team is immediately following up on this success to further define this extremely high-grade and thick portion of gold mineralization within the already impressive East Zone at Rowan.

Figure 1. Impressive visible gold showing within intercept grading 1,120.19 g/t Au. Diamond drill core in this photo is

NQ diameter (47.6 millimeters).

Shane Williams, President & CEO, stated,

“There are very few places in the world where the geologic conditions exist to produce an intercept of this calibre, and the Red Lake district has demonstrated time and again that it is most definitely one of them.

“Our exploration team has already been immensely successful with the drilling program at the Rowan Mine target in 2023, and the spectacular drill results highlighted in this news release only emphasize the upside that still exists at Rowan.

“Our team is confident that we are only just starting to scratch the surface at Rowan with many more exciting discoveries to come.”

The high-grade mineralized vein zones encountered at the Rowan Mine target area continue to exceed expectations, confirm the geologic model, and further improve the existing high-grade (9.2 g/t Au) 827,462 ounce Inferred Mineral Resource at the Rowan Mine.

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
