## **Shane Williams, President & CEO, stated,**

*“The team continues to make great progress with the underground definition drill program at Madsen.*

*“We always had high expectations for the Austin Zone, which makes up the bulk of the existing resource, but to see this zone capable of producing gold grades in excess of 250 grams per tonne over meaningful widths is particularly exciting and underscores the upside that still exists within the main deposit.*

*“Additionally, the results coming out of McVeigh are quite positive. With a better understanding of the geologic model, structural controls and ore distribution in McVeigh, we are*

*seeing renewed potential in this area.”*
