

Westgold Resumes Mining at Great Fingall

Westgold Resources (ASX | TSX: WGX)

Has successfully fired the first high-grade stope at its iconic Great Fingall Mine – now accessing virgin areas of the famous gold reef last mined more than a century ago.

Located near the town of Cue in Western Australia, the Great Fingall mine produced an astonishing 1.2Moz of gold between 1891 and 1918.

Westgold Recommences Mining at Great Fingall

Perth, Western Australia, 11 December 2025: **Westgold Resources Limited (ASX | TSX: WGX** – Westgold or the Company) confirms it has successfully fired the first high-grade stope at its iconic Great Fingall Mine – now accessing virgin areas of the famous gold reef last mined more than a century ago.

Located near the town of Cue in Western Australia, the Great Fingall mine produced an

astonishing 1.2Moz of gold between 1891 and 1918 – from just 1.9Mt of ore, notably without the benefit of modern mining technology.

At steady state production from 2027, Great Fingall will deliver ~0.5Mtpa of high-grade ore to Westgold's Cue processing hub, supplementing ore feed from its nearby +1Mtpa Big Bell mine.

Highlights

- Reef mining has recommenced at the historically significant Great Fingall Mine near Cue.
First stope firing delivered grades averaging between 3-4 g/t Au.
Great Fingall high-grade ore to boost production at Cue processing hub – complementing Big Bell's volume contribution.
Ramp-up underway toward steady-state production of ≈ 40ktpm from Great Fingall and Golden Crown by late FY27.
Underground drilling continues – targeting mine life extensions and new targets beyond the current six-year plan.
