## Westhaven Gold Management Comments

*“These high-grade drill intercepts, including **614 g/t gold** and **2,070 g/t silver**, help further validate the*

*high-grade nature of this project.*

*“Hole SNR21-04 is one of the shallowest high-grade Vein Zone 1 intercept drilled on Shovelnose to date. It is encouraging to see the expansion of mineralization and the continuity of high-grade within the South Zone, especially as we continue to drill this area in preparation for an inaugural maiden resource.*

*“With the recent exploration success at the FMN Zone (SN21-161:15.97m of **9.15 g/t Au** and **27.43 g/t Ag**), and with several high-priority targets generated from ongoing exploration programs including geophysics, geochemistry and prospecting, a 3rd drill is being mobilized to the property.”*

**Gareth Thomas, President & CEO of Westhaven Gold.**

*“The recent results from holes SNR21-03 and SNR21-04 expanded the area of high grade situated along strike above 1250m elevation in Vein Zone 1.*

*“These two holes continued northeastward into the underlying Vein Zone 2, where significant intervals of mineralization were also encountered, including 1.64 g/t Au over 96.30m (SNR21-04, 219.00-315.30m)”.*
