## Westhaven management comments

*“Drilling continues to expand the high-quality FMN zone into the southern zone, which is approximately 2 kilometers to the*

southeast.

*“Drill intercepts SN22-213 (38.22 meters 3.36 g/t gold and 11.48 g/t silver) and SN22-229 (14.96 m 5.69 g/t gold and 343.57 g/t silver) are respectively 40 meters and 80 meters along the strike of SN22-212 (23.03 meters of 37.24 g/t gold and 209.52 g/t silver announced in April 2022), that is 240 meters along the strike of SN21-161 (15.97m of 9.15 g/t gold and 27.43 g/t silver announced in May 2021).*

*“Gat SN22-229 is the highest silver intercepting hole (5,140 gram meter AG) that has been drilled on the site of Shovelnose so far.*

*“There are hundreds of meters of largely untested stroke length in the FMN zone, both towards the south zone and towards the Franz zone. In addition to hosting Bonanza degrees, the FMN zone benefits from minimal overload with mineralization from the rock surface.”*
