

# Zen Graphene Falls as Mask Sales Suspended

## Zen Graphene Solutions (TSX.V: ZEN)

Is aware of the statements from Health Canada (HC) regarding masks containing graphene and is aligned and supportive of the steps taken to regulate the use of graphene and remove products that are unsafe for the public.

ZEN has had comprehensive testing performed on its biocidal coating and demonstrated that it can provide an added level of protection for front-line workers and public.

## ZEN Graphene Solutions Comments on Graphene in Protective Face Masks

**ZEN Graphene Solutions Ltd.** (“ZEN” or the “Company”) (**TSX-V: ZEN** and **OTC:ZENYF**), a Canadian, next-gen nanomaterials

technology company, is aware of the statements from Health Canada (HC) regarding masks containing graphene and is aligned and supportive of the steps taken to regulate the use of graphene and remove products that are unsafe for the public.

ZEN has had comprehensive testing performed on its biocidal coating and demonstrated that it can provide an added level of protection for front-line workers and the public.

Most importantly, Nucro-Technics (a world-renowned testing facility) has performed extensive testing for cytotoxicity, irritation and skin sensitization and shown that its product is safe.

Our partner Trebor Rx Corp. (Trebor) has also completed considerable testing on masks and has successfully passed Canadian requirements as a level 1 Medical Device for ASTM Level 1,2 and very recently, level 3, the highest level for surgical masks.

Beyond safety testing on masks, ZEN is actively exploring using its formulation for potential human use as a pharmaceutical product and has completed two phases of safety testing on lab animals with no negative effects after repeated ingestion at levels thousands of times higher than needed to eliminate pathogens.

Due to the extremely encouraging results related to efficacy, the Microbiologist-in-Chief of Mount Sinai Hospital who conducted the studies, Dr. Tony Mazzulli, has recommended exploring the use of this compound for the treatment of human infectious disease, which is currently underway.

The efficacy testing included several dangerous and hard to deal with antimicrobial resistant strains of bacteria. These results, combined with the excellent safety profile established to date, has resulted in ZEN having discussions with several interested parties from the pharmaceutical industry, organizations focused on antimicrobial resistance

and world-class researchers in academia.

## Zen Graphene Management Comments

“Our focus as a company is developing technology that helps protect people and the environment. An integral part of that is working with experts and independent third parties to validate effectiveness and safety.

“Through this approach we have proven that our technology is highly effective against pathogens and safe for use on masks. Further, we are now on the path to demonstrating potentially even more important use as a pharmaceutical for human infectious disease while upholding the same excellent safety profile.

“Safety and third-party validation will always be a top priority for ZEN – and is why we are glad Health Canada has taken these steps to protect the public from substandard products like those removed from the market in Quebec last week.”

“Our technology was borne amidst the pandemic out of a need to better protect front-line workers and those most vulnerable. Through our collective experience this past year, we firmly believe the need for additional protection will endure and why we will remain steadfast in achieving this goal.

“We are fully committed to working with Health Canada and our partner at Trebor to ensure our Made-in-Canada solution can bring additional protection to those that need it most as quickly as possible.”

**Greg Fenton, ZEN CEO**

## **Trebor Management Comments**

“As a Canadian owned manufacturer of personal protective equipment (PPE) we fully support Health Canada’s decision to warn the public to the dangers of substandard imported PPE Products.

Companies that have rushed dangerous PPE to the public should be identified and their products removed from circulation. At Trebor we are proud to hold ourselves to the highest standard.”

“Over the past year Trebor Rx’s products have undergone rigorous testing at Canadian labs to ensure we can stand behind the efficacies Canadians deserve. We are committed to working with our partners at ZEN to develop innovative PPE technology to support frontline workers battling against COVID-19.”

**George Irwin, Trebor CEO**

## **About ZEN Graphene Solutions Ltd.**

ZEN is a next-gen nanomaterials technology company developing graphene-based technologies that help protect people and the environment.

ZEN is currently focused on commercializing a patent pending graphene-based coating with 99% biocidal activity, including against COVID-19, and the potential to use similar graphene

compounds as pharmaceutical products against infectious diseases.

The company has a significant R&D pipeline with an interest in monomers, polymers, metal alloys, corrosion coatings, biosensors along with the production of graphene oxide and graphene quantum dots.

Additionally, the company owns the unique **Albany Graphite Project** which provides the company with a potential competitive advantage in the graphene market.

Labs in Japan, UK, Israel, USA, and Canada have independently demonstrated that ZEN's Albany Pure™ Graphite is an ideal precursor material that easily converts (exfoliates) to graphene, using a variety of mechanical, chemical, and electrochemical methods.

## City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email [andrew@city-investors-circle.com](mailto:andrew@city-investors-circle.com)
